

**Expanded word & issue index for  
C. West Churchman "The Design of Inquiring Systems: Basic Concepts of Systems and Organization".  
(New York: Basic Books, 1971)**

[<http://www.informatik.umu.se/~kivanov/chuindex.pdf>](http://www.informatik.umu.se/~kivanov/chuindex.pdf)  
[<http://www.informatik.umu.se/~kivanov/chuindex.html>](http://www.informatik.umu.se/~kivanov/chuindex.html)

This word & issue index is customized to the purpose of fostering wider and deeper applications of a social dialectical systems approach. It is intended to be used in conjunction with the word index published in the book. Issue-indexing implies that even if the particular word does not appear on the referenced page, either a synonym, an associated, or analogue issue does. Additional explanatory material related to the same philosophical background can be found at the following URLs: [<http://projects.iss.org/C\\_West\\_Churchman>](http://projects.iss.org/C_West_Churchman) and [<http://en.wikipedia.org/wiki/C.\\_West\\_Churchman>](http://en.wikipedia.org/wiki/C._West_Churchman).

Parenthesized page numbers, italics, and bold face types in the text below indicate an increasing degree of relevance and importance. Words referenced after the abbreviation "cf.", and whose radicals are not found in the index as is the case for words put within parentheses, point to entries in the book's own index or in Webster's Third New International Dictionary (unabridged) or in specialized dictionaries of the fields of information science and philosophy of science.

The purpose of presenting this index to a wider audience is to allow for a starting point for deeper and wider inquiries in a research tradition that allows for broad systemic relations between disciplinary areas and key notions as they appear in the index. The claim is that this book contributes to the establishment of a time-stable theoretical conceptual ground, or a "language" which – close to the tradition of philosophical pragmatism – facilitates communication among researchers who work in different schools of thought and areas of application. In particular this initiative aims at facilitating – in one same research organization – that every researcher be able to contribute to the work of colleagues by means of the easier initial understanding afforded by an tentative initial set of shared concepts which may be argumentatively modified or rejected in the further course of a particular inquiry.

Permission to make digital/hard copy of this work for personal or education use is granted provided that it is not done for profit or commercial advantage, and notice is given of the source.

absolute mind, 178; cf. progress, mind	233; cf. satisfactoriness, values	113, 115, 132, 135, 141, 146, 146, 150, 154-156,

- actor network theory ANT, cf. actor network
- adaptive systems, 63, **65**; as incrementalism, 65-66; and objectivity, 63; cf. evolution, measurement, flexibility, growth, progress
- adjustment, of observations (Ptolemaic), 196
- advertising, incentives and pricing, 167
- aesthetics, 18, 26, 37, 49, (99), 106, 114, 120, 140-141, 143, 155, 158, (170)-171, 195-196, 199-200, 203-205, 216-217, 249, 251, **264**, 266; transcendental (Kant's), 129; as appropriateness, 142; as good in itself, **249**; as artistic creation, 250-251, 266; as joke-play, 235; as 201-202; and fact or information, 164; as living reality and drama, 171, 173, 175; as life vs. knowledge as grey theory, 204; as realism vs. idealism, **199**; activities and workflow value-added, 166; description of, 156; and change, 271; plan of, 164, 167; as anti teleological good in itself, 249, 254; picture of alternative actions or Weltanschauung, 169; language theory, 102; as process, 204; and action meaning, 158, 163, cf. Abraham Kaplans "action meaning"; cf. implementation, reaction, function-structure-teleology, is-ought, ethics, stimulus-response, interactivity, pragmatism, transaction, process, log and rock on the road, producer-product, romanticism taste, 266; as subjectivity, 159; and monism, 73; as formal elegance, 81, 120; as distanced contemplation, 172-174; as styles, 170; as colors and shapes, 139; repertoire of styles, 177; as policy scenario, 171; as the moral quality of the act, 49; as related to clarity and distinctness, 19-21; as creativity, 4; as poetic mood, 153; and beauty, love and truth, 264; art, 267; visual cartoon presentation, 182-184; aesthetic value, (189); aesthetic intuition, 124; and ethics, 216-217; beauty of a system and pragmatism, **120-121**; aesthetic mood, 182; aesthetic sensuous intuition, 145; as (in Leibniz) action language, 102, 115; cf. is-ought, imperative, indicative, illocutory, perlocutory, Austin, (Searle)
- action research; cf. action science, implementation
- active observer, 159
- activity, 7, 166, 249; as good in itself or purposeful activity, 249; description of **43-46**; 166; cf. action, actor, ateleology
- actor, system's, 44-49, 71, 200-201, 204; actor network, 73, 171-174, 182, 185; functional, 44; social: cf. action; cf. system (and subsystem-component, teleological), client, decision maker, manager, designer, metadesigner, convergence of actor roles; as actor on scene: cf. theater, narrative
- actor network, 18, 73, 171-174, 182, (193-194); cf. chap. (7) *passim*, innovatio
- faith to bridge perception and clarity, 242; as related to obscure non-clear and confuse ideas, 21; dimensions of aesthetical discussion (complexity, obscureness, confusedness), 37; cf. beauty, image, imagination, drama, narrative, taste, appropriateness, style, form, function, creativity
- agent, intelligent, 116-118; as in Internet, 117; cf. actor, decision maker, artificial intelligence AI
- aggregation, of data, 161
- agreement, **85**, 88, 92-94, 97, 101, 104-105, 110, **112**, 114, **118-119**, 126, 154, 157, 161-162, 169, **174**, 187-188, **190-194**, **198-199**; esp. 190, 194, 198-199,

- 202, 243; control on, 150; in naive empiricism, 191; disagreement for, 193; as objectivity, 150; unconscious Lockean, 194; isomorphic, of inputs, 154; basis of conventional, 112; cf. consensus, consistency, cooperation, convergence, conversation, debate, conflict, pluralism, understanding, democracy, politics, enemy, disagreement, contradiction
- AI; cf. artificial intelligence, expert systems, intelligence
- algorithm, 88-89, 140; algorithmic thinking, 140
- alienation, 159, 161, 163; cf. commitment, participation
- ambiguity, as related to redundancy, 161
- analogy, 141, 143, 148; rich analogy, **143**; cf. metaphor
- analysis, 4, as decomposition, 67; as dichotomy, 159; cf. system-subsystems, partitioning
- analytic philosophy, 134, 160-161
- analytic sentences, 134
- Anaxagoras, 41, 78
- ancestors, 201; cf. death, past, future generations
- ANT; cf. actor network (theory, Bruno Latour, Michel Callon)
- antagonism, 178; cf. enemy, conflict, cooperation
- anti-planning, 49; cf. anti teleology, anti-thinking
- anti teleology, 49, 216-217, 246-258; cf. anti thinking, Checkland, postmodernism, ateleology, romanticism
- anti thinking, 49, 176, 203; cf. anti teleology, ateleology, aesthetic, antinomy, relativism, postmodernism, romanticism
- antinomy 144, 170, 172; and synthesis, 172; cf. antithesis, vs. contradiction, vs. enemy
- antithesis, 170, 172-177
- aposteriori or a-posteriori, 110; cf. apriori
- apperception, 30, 73-75, 82, 93-94, (141-146, 197-198); cf. representation, Weltanschauung, sweeping-in, attention, will
- applied problem, triviality of, 139-140
- appreciation; cf. value, evaluation, ethics, quality
- appropriateness, 130; of solution, 142; cf. aesthetics, beauty
- approximation, 4, 95; to truth, 144; endless, 4; cf. convergence, accuracy, truth, reality, relativism, chap. (9), *passim*
- apriori or a-priori, 88, 109-111, 115, 124-126, 128-129, 132, 136, 194, chap. 6, *passim*; vs. aposteriori, as hidden assumption, 184; Lockean, 99; empirical, 136; 110; self-examination of, 129; empiricist, 134; minimum, 124; Ptolemaic adjustments, 196; revision of, 194; generalization, 109-110; validation of, 130; cf. presuppositions; minimal, 124, 133-138; for empiricism, 133, 136; cf. aposteriori (a-posteriori)
- Aquinas, St. Thomas, 18
- arbitrary, 105, 117, 186-187, 189; cf. conventional
- arbitrator, in conflict, 174; distinguished from synonyms: conciliator, mediator in negotiation or bargaining
- archetype, 244-245; cf. myth, unconscious, Jung
- archive, 101; cf. database, library
- architecture, 7; cf. aesthetics, form, function, structure
- argumentation, 175-176; cf. debate, learning, conversation, agreement, drama, sweeping-in, logic, Hegelian I.S. (chap. 7), Leibnizian fact nets (chap. 2)
- Aristotle, 18, 108, 210-211, 253, 258; Aristotelian imagery, 210-211
- arithmetic, 128-129, 130.131, (134), 192, 197; alternative, 129; and geometry and kinematics, 197; cf. mathematics
- armament; cf. weapon
- arrows-and-boxes, inputs as, 107
- art, 158, 249, 266; and management, social science, and physics, 93; cf. aesthetics, apperception
- artefact, separability or context of, 54; cf. technology, machine, artificial, instrument, production, function, means, tool
- artificial, 4, 17, (131), 150, 156, 158, 161, 257, 259; cf. virtual, artificial intelligence, expert system
- artificial intelligence, 4, 16-17, (21-22), 23, 26, 27-28, 39, 41, 63-64, (71), 74, (78, 87, 90), 91, 93, 99-102, 115-116, 118-119, 124, (129), **131**, 134, 138, **150**, 156-157, **158**, **161**, 195, 197, 214-215/216, 256-257, **259-260**, 262, 276-277; **chap. 4, passim**; cf. expert systems, intelligence; artefact, agent intelligent
- as-if, 46
- aspect 46, 75, (81), 107, 113, (119), 120, 124, 125, 149, **159**, **166**, **169**, 170-171, **174-178**; view, 194, 225; as subjectivism, 151-153, as

- state of mind, 156-157; and set of representations of object, 159; as descriptor, 192; cf. perspective, viewpoint, attitude, apriori, Weltanschauung, apperception, ateleology, anti teleology, vs. objectivity, subjectivism, relativism, observation, view, vision, image, picture, description, vs. action
- aspiration (ideal), 253
- assumptions 94, 145, 125, 183; analysis of, 171, 178; basic assumption, ontological assumption, 184, 192; and unexplainable events, 136; cf. presuppositions, foreknowledge
- astrology, 244
- astronomy, 135, 196-197; astronomical clock, 135; cf. Newton, Copernican revolution, Ptolemaic theory
- astute empiricist, 150
- ateleology, as basic design, 152-153, 216-217, 227-228, 252-255; cf. anti teleology, teleology
- atoms, 209
- attention, 98-99, 102, **112**, 125, 138, 142, **166-168**, 185; cf. relevance, observation, aspect, Weltanschauung, perception, teleology, apperception
- attitude 105, 118, 159, 172, 252; as psychological temperament, 261; as alienated experimenters, 159; so-what, 164; cf. aspect, viewpoint
- attribute, cf. property, 99-107, 202
- auditing, 162, 190
- Austin, John L., cf. action language, illocutory forces
- authoring, cf. learning
- authority and authorization, 99, 123, 144, 149-150, 153, 161-164, 167-168, **196**; delegation of, 163-164, 167; vs. strategic decisions, 196; as perfect observer, 40; of international body, 188; cf. management, legitimation, responsibility, power, hierarchy, ethics, dogma
- authorization, 167 (SAF), 160-162, 164
- automation, 115-116; cf. artificial intelligence
- autonomy, cf. independence, freedom, trilogy, handlingsutrymme (in Swedish), convergence
- autopoiesis, 158, (169)
- axioms, 136; of clock events and kinematical, 135; proof of empirical apriori set of axioms, 135-136; and theorems, 136, 142; cf. absurdum, theorems, hypothesis
- background, visual, 125
- backtrack, backtracking, 100
- bargain, 174; cf. negotiation
- basic data, 137; raw data, 82, 125, 133, 165-166
- Bayesian probability, 114, 153
- beauty, of systems, 120; of love, 264; cf. aesthetics, art
- behavior, 149, 159
- behavior, 148, 151, 154, 156-157, 159
- being: cf. existence, ontology, essence, substance, phenomenology, interpretive
- belief, 24, 114, 171-172, 184; cf. faith, conviction, guarantor, trust, hope, doubt
- benefit, as resource allocation, 156; cf. performance measure, income, profit, ethics
- Berkeley, G., 35, 105, 122, 150; cf. solipsism
- Bessel, 197-198; effect, (156); cf. reaction time
- bias, 141, 176, 183; cf. measurement, error, accuracy
- biology, 116, 192, 197-198; molecular, 197; cf. function, life, organism
- bird, black, example, 29-30
- bird, example, 123-124; cf. swans
- bird-egg, causality example, 134
- bit, of information, 161
- black box model, 154, 156; cf. stimulus-response
- blood, as conviction, 178
- body, knowledge through/of, 263; cf. sensation, perception, sensuous, empiricism, aesthetics, hypermedia, implementation, reality, mind, unconscious
- Boolean compounding, 100-101, 106; class logic, 108-109
- boundaries, 222
- brain, 6, 23, 27-28, 39, 41, 118; as information processor, 161; monkey-brain, 23; research, 161; cf. spirit, soul, mind, reason-intellect, artificial intelligence
- brain, human, 161
- brain, monkey or ape, 23
- bricolage and tinkering, 41, 51, 153, 193-194, 196; cf. improvisation, adaptive, evolution, ateleology, anti teleology, intuition, play, shift-and-drift
- brilliance (intelligence), 222
- browsing; cf. library, representation, navigation
- Buddha, 204; cf. God
- Buchanan, B., 79n
- budgeting, 67; and cost accounting, **166-168**; cf. PPB
- bureaucracy, 162
- business, cf. inventory, manufacturing, sales, e-business

- butterfly and storm example, 63  
buzzwords, in management fads, 92  
calibration, 52, 132, 135-136 (A. Danielsson), **152**, 191, 198; as adjustment of readings, 195-196; cf. measurement, standard  
capital, 165-167; cf. inventory, environment, investment  
car, and rock on road, 114-115; log across the road, 160  
cardinality, and ordinality in measurement, 152  
care; cf. Iova, attention  
Carnap, 81  
case study, 131-132; (152), 171, 193, 255-256; and generalizations, 79, (108); and fact, 256; cf. ethnographic method, observation, generalization, uniqueness  
catalogue, of opportunities, cf. repertoire  
categories, 75-76, 108-109  
catchwords, in management fads, 92  
causality, 23, 44, 110, 113, 126, 131, 134; vs. statistical correlation, 131; in Hume, 130-131; causal hypotheses, 113; cf. explanation, understanding, producer-product, change  
centralization, 67-68; as levels, 76-77; cf. decentralization, hierarchy, levels  
certainty; cf. uncertainty  
certification, cf. validation  
change, 3, 11-12, 12, **14-15**, 18, 41, **43**, 47-8, 50-52, 63-64-66, 77, (160), 175, **194**, 196-**204**, 215, 228; resistance to, 14; and politics-law revision, **193-194**, **199**; why, **194**; of object of measurement, **196-197**; optimal, 175; as revolution or counter-theories, **199**; as revision of apriori, 194; and variation and revision in measurement, 191-200, 204; as adaptability to environment, 213; vs. restfulness, 200; as design, p. vii; cf. evolution, stability, process, variation, progress, shift and drift, trial-and-error, bricolage, creativity, learning, improvement, sweep-in, implementation, revision, causality, variation, revolution, flexibility, maturation, development, synthesis  
chaos theory, as example of butterfly vs. storm, 63  
chapter (1), 3, 63, 74, 77  
chapter (2), 19, 21, 95, 97 (ex.), 105, 111, 116, 119, 122, 135, 144, 176-177 (summary), 194, **197**, 241  
chapter (3), 20, 37, 34-35, 42, 39, 40-41  
chapter (4), 37, 39, 79, 116, 144-145, 197-198, 180, 259  
chapter (5), 37, 95, 20-21, 33 111, (Leibniz), (118), 116, 122-123, 144, 177, 194, 242, 259, 105; vs. Leibniz, 241-242  
chapter (6), 37, 128, 20, 70, 87, (95), 106, 109, 111, 116, 126, 149, 176-177, 194, 242, 259, 265  
chapter (7), 20, 37, 149, 70, (95), 105, 119, 147, 194, 215, 249, 265, 271  
chapter (9), 20, 37, 85, 186, 46, 85-86, 105, 119, 211, 214, 222-223, 253  
chapter (10), 209, 238  
chapter (11), 93, 122, 219  
chapter (12), 180, 230, 180  
chapter (13), 237, 229  
chapter (16), 274, 109?  
character; cf. entity, individuation, pattern, property, object  
checkers-chess, examples, 22, (125), 138, 142; cf. games  
Checkland, P.; 227-229, 249, 252, 254; vs. anatomy of goal seeking, purpose, will, and anti thinking, anti teleology, 247-258; ateleology, 227-228, 252-255; rich picture, 71-72, 170-171; and pluralism, 71; cf. Weltanschauung, 169-176  
checks and balances, 169  
chemistry, chap. (4) *passim*, 116, 144, 198  
chess, 22-23, 26, (120), (125), 138, 142, 187 (arbitrary), 189; cf. checkers-chess  
Christ, cf. God, religion, ethics, Buddha, hero  
Church; as design of individual's relationship to his God, 205; vs. expertise in moral matters, 163; cf. religion  
Churchman, C.W., on global ethical management, cf. ethics and <http://www.haas.berkeley.edu/~gem>  
circle, vicious, 169; cf. vicious circle, infinite regress  
clarity, clearness (cf. simplicity), 20-21  
classes, 33, 108-109, 159; cf. logic  
classification, 33, 36, 42, 117, 159, 186-187, **192**, 204; coding, logical division, exhaustive-inclusive, 192; as distinctions, 192, 270; as labelling, 101; of sciences, 197; cf. measurement, partitioning, distinctions, taxonomy, categories, definition, partitioning  
clear, vs. distinct, and simple vs. complex, 19-21  
client, 47-**48**; mankind as generalized client, 65 vs. 67, 200-201; as future generations, 201; as an ought, 48; and ethics, 48

- clock, cf. space-time, 106-107, 109-110, 131-132, 134-135; as an a priori, 110, astronomical botanical psychological, 110; astronomical, 110, 135
- closed system, 44
- coarse picture; cf. detail, image, clarity vs. simplicity
- coconstruction, as collective mind, 162; cf. construction, cooperation, consensus, general will, dialectics, learning
- coconstructive mind, 71, 162, 174
- coding; 117, 192; cf. classification, taxonomy, measurement
- cognition: cf. cognitive models, recognition
- cognitive dissonance, 171
- cognitive models, 156-157-158, 160-161; of value judgements, 102; recognition, 145; cognitive science, 161; cognitive styles: cf. styles, of inquiry (chaps. 2-10); cf. learning, inquiry, knowledge, mental models
- coherence (theory of truth), 33
- collaboration: cf. cooperation, work
- collective conscious, 154, 162, 164
- collective mind, 70, 162, 194, 196
- collective unconscious, 203, cf. Jung, unconscious
- color, perception and observation of, 101, 103, 150-151, 157-158, 164
- comedy, 254; cf. comic
- combination, and imagination, 31-32, 36; cf. creativity
- comic, 178, 205
- command, 115; ; cf. imperative mood
- commerce, Internet-, 165; requiring decomposition principle, 67; cf. inventory warehousing, e-business
- commitment (cf. conviction, vs. cf. alienation); ontological, basic assumption, 192, 177
- common sense, 19, 135, 162; realsim, 19; in pluralism, 71
- communication, 5-6, 35, 107, 118-119, **123**, 125, 135, 152, 169, 171, 198; for explicitation of design 155-157; rich, 122; language of, 124; scientific, 61; efficiency of ICT information and communication technology, 137; cf. conversation, language, democracy, agreement, cooperation, Internet
- communicative action; cf. action language, is-ought, Habermas
- communism, 172-173, 222
- community, Lockean, chap. (5), 101, 123, 187, 189, community of minds, 97; of practice, 167; conventional, 150; community or public knowledge, 154; interpretive community, **159**; cf. Lockean I.S. chap. 5 *passim*
- comparative method, 152-153
- comparison, 187; of utilities, 155; and transformation into numbers in measurement, 187; cf. measurement, ordinality and cardinality, otherness
- competence, 191, 200, 228; core, 184; in observation as judgment of competent over-observer, 191; cf. knowledge, learning; expert, perfect or normal observer, perfect observer, metadesigner, implementation, practice, evaluation, measure of performance
- competition, between fact nets, 86, 93; cf. chap. (7) *passim*
- completeness, 124; 199, 262; of empirical count, 120, 124; cf. contentment
- complexity, 56, 137; and simplicity, 141; and simplicity, clarity, and distinctness, 19-21; cf. simplicity
- components, as subsystems, 7-8, 49-60, 56-57, 67, 167; cf. subsystems, parts
- compromise, 174; cf. negotiation, agreement
- computer as person (ref. Janlert, L-E), 214; cf. behaviorism
- computer science, relevant direct or indirect references to, vii, 6, 9, 11-13, (14), 15-18, 20-21, 25-27, 35, 37, 45, 54, 58-59, 80, 82, 90-93, 101, 104, 112, 115-116, 118, 125-126, 129, 130-132, 137, 150, 158, 160, 171, 195, 197, 212, 214, 216; parsing 20-21, 142-143, 202; executive of operating system, 27; intelligence of, 259; as instrument, **81-94**; support, 6; cf. tool, instrument, Hegelian IS, artificial intelligence, program
- computer support, 115-116, 118; for negotiation, cf. Hegelian IS; cf. tool, instrument, artificial intelligence
- computerization, as logical reconstruction, 195
- computing , science: cf. algorithm, and Leibnizian inquiring systems, chap. 2 *passim*
- computing, ubiquitous: cf. mobile Internet
- conceptual framework, 82, 143; cf. system definition, model, theory
- confidence, 83, 90, 111, 113, 199; cf. trust, conviction,

- confirmation  
 conferencing, 13  
 confirmation, 81; degree of, 80, 83; cf. confidence  
 conflict, 73, 105, 173-174, 177, 185, 188, 191, 196, 199, 203; resolution of, 174, and cf. diplomacy; of ideas, 177, 185; in measurement, 190; cf. agreement, disagreement, debate, enemy, diplomacy  
 confusedness, 96; as related to aesthetic, cf. simplicity, complexity, clarity, distinctness  
 connotation, 161; cf. denotation or extension  
 consciousness, 28, 39; political, 184-185, 276; cf. self-consciousness, self-reflection, explicitness, unconscious  
 consensus, 92; cf. agreement, consistency, chap. (5) *passim*  
 conservative, and reactionary, 17, 204; cf. reactionary, revolution, change  
 consistency, 31-32, 190-191, **193**, 195, 198; in replications of observation in measurement, 191, 193; as overcoming of inconsistency, 197; cf. agreement, consensus, ambiguity  
 construction, 14, 33 & 175 (embryonic models), 56-57 (learning -part of the system), 63 (adaptivity-flexibility-stability), 105, 120 (who), 141 (flexibility), 162 (audit), 169 (picture), 171 (Hegel), 172-174 (coconstructive mind), 176 (cost), 199, 219-220, 227-229, 232, 235, 250, 253-244; as system reconstitution, 67; cf. fact-nets, consensus  
 construction, criticism of, 33, 63, vs monistic apperception, 75-76; as learning, 108; depictive, 141 & 145; and agreement, 173, 174, 176-177, 194 ; challenge of **198-199** ; vs. embryo, 14, 15, 33; vs. change, 41; as trial and error, 51; as adaptive system, 63; vs depictive reality, 76; as progress, 178; as pluralism and common sense, 71; as collective mind, 162  
 constructivism, 72; cf. construction  
 constructs, 72  
 consulting, 74; and system, 184; cf. expertise, planner, designer  
 contentment, 199  
 context, 109, 167; and separability, 54; contextual induction, 109, 112; cf. system, environment, narrative, textualization (Zuboff)  
 contextual justification, 112  
 contingent facts or truths, 29-31, 76, **88**, 96  
 continuous systems  
 development, cf. evolution, improvement, change, revision, coconstruction, stability, learning, reengineering  
 contradiction, 32, 108, 170, 172, (182); as antinomy in unconstrained reason, 145, 170; apparent, 136; self-contradiction, 31; as stopping of formal inquiry, 70; vs. deadly enemy, 172; vs. contrariness, 182; cf. counter-instance, agreement, conversation, antinomy, self-contradiction  
 contrariness, 182, 193; logical, 182; vs. dual Weltanschauung, 198; cf. (counter)-hypothesis  
 control, 135, 150, 158, **196**; as self-reflection, 158; as test of validity of results, 149; cf. guarantor, management, executive, implementation, authority, hierarchy, cybernetic feedback, power, evaluation, monitoring  
 conventional, 71-72, 101, 105, 112, 114-**115**, 117, **119-120**, 123, 135, 137, **150**, 186-189; community, 150; Lockean inquirers, 115; cf. arbitrary  
 convergence, 32-34, 95-96, 175-176, 194, 197, 199, 202, 241; of system actor roles, 200-201, 204; cf. **sweeping-in**, approximation, agreement, accuracy, ideal seeking, monism, Singerian inquiring systems chap. 9 (*passim*)  
 conversation , 70, 112-113, 136, **172-175**, 185; conclusion vs. question, 118-119, 172, 277; cf communication: viii, contradiction, debate, sweep in, conversation killing  
 conversation killing, 6, 104-105, 144, (174), 198; as uncertainty blocked our of discourse, 202; depictive, 115; convention, 123; 160-164, 173, 198; through contradiction, 70; vs. deadly enemy, 172; cf. disagreement, agreement, counter-instance, debate, conflict, enemy, contradiction, conversation  
 conviction, 98-99, 111, 119, 122-123, 154, 170-174, 177-178, 184, 190, 229; from refinement or precision, 190; as vision, 178; origin of, 174; designer's, 154; as reflective intuition, 107; cf. feeling, vision, commitment,

- engagement, evidence, credibility, confidence, trust, faith, rhetoric, aesthetics
- cooking, 266; cf. nourishment, gastronomy
- cooperation, 54, 118-119, 121-122, 156, 174, **200-203**, 250, 254; as ethics defined, **200**; cf. learning, implementation, trilogy, production, agreement, politics, ethics, power, democracy, conflict, CSCW, love, charity
- Copernican revolution, 137, 196
- core competence, 184
- correlation, statistical, vs. causality, 131
- correctness, 170; cf. accuracy
- correspondence, reality as, 160
- ost accounting, 65-66, 124-125, 163-164, 167-168; in inventory control, 165
- cost, and benefit, 67, 90-91, 92, 120-121, 124, 141, 163-165-**166**, **168**; 177, 245, 270; of information, 120-122; opportunity cost, 165; and accuracy, 62; of empirical research and politics, **120**; as resource allocation, 156; cost reduction, 124; cf. performance, measure of performance, resource, downsizing, reengineering
- cost, systemic, 55, 141, 167-**168**, 176-177, 188; and empiricism, 120, opportunity cost, 167, 169; marginal, 141; cost effectiveness, 67; and savings, 124
- counter-instance, 194; counter-induction, 111-112; cf. contradiction, perfect observer
- Cranberg, L.; cf. law, 198
- creativity, 3-4, 13, 17-18, 30, 116, 118, 139-140, 142-143, (167), **195**, 205, 216, 243 (religion), 249; as patterns of discovery, 80, 280; and design, 18, 142-143, 205; as discovery, 195; creative act, 243; in finding a rich analogy, **143**; vs. methodology, 262; and the unconscious, 264-265; cf. design, imagination, vision, production, intuition, learning, inspiration
- credibility or credence, 98, 171-175, 190; cf. accuracy, trust, conviction, validity and validation, evidence, proof
- crucial test, 136, 159; cf. test
- CSCW, cf. cooperation, work, action-activity
- Cuba crisis, 98
- culture, 74, 105, 108, 170; cf. Weltanschauung, tradition, paradigm, Lockean
- community, consensus, history
- cumulative knowledge; cf. fact nets, Leibnizian IS, Lockean IS
- curiosity, 26
- customer, cf. client
- cybernetics, 214; cf. control, management
- cyberspace; cf. Internet, community, system
- data, 6, 8-9, 11, 36, 60-62, 72, 84, 90, 114, 125, 132-134, 137, 171, 215; collection of or memory, 6; separability of, 88-91, 110, 114, 132; collection, 153; data and program, 103; and assumptions, 132; economical set of data, 86, 137; vs. theory, 87; as system, 168; v s. information, 171; as optimum model, 171; immediate sense, 151-152; warrant of, 94-95, 169; raw basic data, 82, 99, 125, 133, 137, 165-166; and generalization, 111; immediacy of sense data, 155; representation, 116, 125-126, and chap. 7, *passim*; cf. symbol, input, picture, image, reception, fact, basic data
- data analysis, 88-91, 114
- data base, 9-10, 60-62, 95, 98, **101**, 106, **108-109**, 110, **114-115**, 117, 120-121, **132-133**, 160-162, 164-165-166, 171, 173, 175, 195, 216, 259; as instructions or program 202; as Lockean IS, 99-118; as library, 117, 121; as function of identifier, 106; as filing system, 101; as "is-it-indeed?", 164; as repertoire, 170; as image of reality, **160**; vs. information system, 85; database systems, 121; transmitting data from, to theoretical sector, 132; acceptance of warranted, 195; cf. object orientation, data collection, retrieval
- data collection, 84, 99-100, 106, 110, 114-115, 116, 120, 125, 132, 153, 155, 191; separability of, 132; cf. measurement, empiricism, rich data
- data mining, 115, 132-133; cf. data collection, data base, statistics
- data security, **161**
- data source, 150; collection from, 153
- data structure, 137, 160-161; cf. knowledge representation
- datadelegationen, 177, 180, 183
- dead, clients, (133), 201
- death, 200-201, 203; dead clients, (133), 201; cf. future generations, ancestors, God
- debate, 32, (87), 158-159, 162, 175, 183, 185, 195, 199; as conversation, 174-175; vs. dialectic, 183, 185; and objectivity, 162, **175**; cf. agreement, disagreement,

- conflict, learning, conversation  
 decentralization, 67-68, 196; as pluralism, 71; cf. centralization  
 decision, 105-106, 114-115, 164  
 decision makers, 43, 47, 52, 68, 92, **200-201**; choice of, 52; and designer or planner, 66, 68; as leaders and heroes, 200; cf. management  
 decomposition principle, 67  
 deduction, 94; and induction, 145; cf. induction  
 definition, **4**, 29-31, 77, 136, 205; operational, 115, 187, 191; redefinition, 136; cf. distinction, classification, translation  
 degree of freedom; cf. handlingsutrymme, freedom, tolerance, politics, power, negotiation  
 deliberation; cf. judgment, inquiry (*passim*)  
 deliberative polls, cf. democracy, democracy electronic  
 Delphi technique, 106; cf. opinion surveys, disagreement  
 demand, 166-167; cf. client, marketing, need, advertising  
 democracy 61, 68, 77, 105, 108, **123**, 149, 158, 163-164, 169, 172-173, 176-177, 188, 194, 196, 203, 269; and law or legal system, 108, **123**; and information, 176-177; as community knowledge, 154; as collective mind, 162; in inquiry, 268-269; as checks and balances, 169; as infinite regress, 169; as mutual observation, 154-155; as agreement in replication, 190; as decentralized control, 196; elec tronic e-democracy or governance, (123), 269-270; cf. participation, cooperation, majority, commitment, work, agreement, pluralism; vs. alienation, marxism, communism, power, law, justice  
 Democritus, 209  
 demonstration; cf. absurdum, axioms, proof, test, validity, truth, conviction  
 Dendral, AI-system, 98  
 denotation or extension, 161  
 depiction, cf. description  
 Descartes, 22, 62, 70  
 description, depictive, 76, **115-116**, 120-122, 124-125, 135, 140-141, 145, **159-160**, 163-164, 166, 170-171, 178, 195, 209; descriptive research, 120-121, 125; error as accuracy of, 201-202; vs. design, 135; descriptive vs. normative model, **133**; cf. image, representation, reality, depiction, qualitative methods, normative, is-ought  
 descriptors, 193; cf. attributes  
 design, vii, **5-17**, 48-49-50, 55, 74, 80, 97, 131, 135, 138, 150, 153-155, 162, **165-167**, 169, 171, 173, 180, 205, 258, (276); defined, 5, 8, 14, 55, 59-60, 205, 258, 276; theory of, **262, 264**, 267; prolegomena to, 16; subjectivistic theory of, **155**; assumptions of, 123; choice of, 56; and judgment, **175**; economy of, 142; and difficulty of planning, 153; essence and objectivity of, **159**; and hypothesis creation, 116; explicitness of, 155 and cf. explicitness; economy of, 141; strategy of, 194-195; of agreement, 157; vs. description, 135; as system, 55; as feeling of appropriateness, 142; and anti teleology, 247-258, 249; and living idea or vision, **173**; ateleology as basic design, 227-228, 252-255; of a priori, 130, 142; ideal design, 74; of calibration, 152; of observation, 119; and creativity, 204-205; of degrees of freedom of action (Swedish handlingsutrymme), 164; of designers, 43, 47, 52, 55; dynamic, 64; intuition in, 25; long range, 48-49; and morality, 249; parsimony, 134; and problems in nature of inquiry, 259-273, 276; of science, 195, 201; and God, 205; separability of, 54, 66-67, 145-146, and "ought", 74; short range, 48-49; of simple inputs, 99; of input, 137-145; simplicity in, 78; of systems, 62-63-64; of input, 128; creative, 143; of an apriori, 130; experimental, 60; and Spinoza, 72; and short-long range goals, 48-49; and is-ought design vs. description, 135; design situation: cf. uniqueness, uncertainty, conflict; basic design and logical reconstructionism, method, 195; vs. description, 135; for objectivity, 149; participatory: cf. participation vs. alienation; of agreement-standard, 189; and history, 190, 195, 197; design system vs. system, 62-63, 111, 115; as change or as leadership, 50; critical design problems for I.S. with maximal apriori, 142-144; cf. creativity, form, function, creativity, intuition, romanticism, vision, ideal, stability, quality, method,

- learning, explicitness, implicitness, education, implementation, cooperation, tacit knowledge, construction, production, development, aesthetics, progress, Rittel H.
- design work, the hidden rationale, 5, 8, 20, 32, 41, 43-46, 54ff, 125-126, 141-143, **153-156**, 170-173, 243-245, 255, 262, 265, 276; practice vs. imagination, 13; creative act, 17; imagination, 30, 32; elegance, 37; design rationality-ethics-aesthetics, (38), 49; personal non-theoretical knowledge, 87-88, 150; observed (design of design), 150; as personal vs. community knowledge, **154-155**; explicit design, 154; and method, 171-172; design process and reflective intuition, 107; cf. tacit knowledge, parti, judgment
- designer, 43, 47-48, 56, 81, 91, 120, 146, 150, 153, 155, 158-159, 162; as having a peculiar and separate role, 150, **153**; as true paradoxical non-designer, **155**; behavior and designed designer, 150; anti teleology of, 249; vs. decision maker, 66, 68; as observer, 159; subjectivity of, **115**; identity of, **146**; isolation of, 120; vs. user, 118; designer's type of feeling against method, **92**; designer's knowledge, 154; and politics, 66; as observer, 150; designer's conviction, 154; return home of from glamour, 203; cf. metadesigner, planner, expertise
- detail, 87, 175, 190; as refinement, 190, 192; cf. partitioning, subsystem of system, level, hierarchy, classification, refinement, attention
- determinism, 209-210; cf. mechanism
- development, 224, 229; cf. learning, progress, evolution, change
- Dewey, J., 189; cf. pragmatism
- dialectic, 170, 177, 182, 199, 245, 262; planning, 180; life of, 175; conviction in, 172; deadliest enemy in, 172; drama-theater in, 172, 178; and epic, 175; eternity of, 245; Hegelian, 170; in humor, 174; in judgement, 175; and leisure class, 176; long-range planning, 184; and political process, 185; and public information, 271; of science, 224; dialectic within dialectic and isolation of dialectic process, 183-184; transcendental, cf. Kant
- dialogue, cf. dialectics, conversation, language, sweep in
- dice, example, 109
- dichotomy, 159, 177; cf. classification, taxonomy, coding, analysis
- dictionary, 29, 33
- difference, make a, 164; cf. pragmatism
- digital information, 161
- diplomacy, as avoidance of misunderstandings: cf. Leibnizian I.S.; as creation of consensus: cf. chap. 5; as synthesis of opposition: cf. chap. 7
- disagreement, 105, 113, 119, 162, 188, **193-194**, **199**; as significant variance or variation, 193; cf. conflict, agreement; conversation killing, Delphi technique
- disciplinary science, 74, 195, 200; vs. interdisciplinary, 198; cf. discipline
- disciplines, 40, 74, 195, as de Raadt modalities, 197; disciplinary knowledge, 200; cf. interdisciplinary
- discourse, 103; cf. narrative, conversation, agreement, argumentation, dialectic, sweep in
- discovery, 195
- discrimination; cf. partitioning, classification, precision, accuracy, definition
- dissent, 105; cf. disagreement
- distinctions, 270; partitioning, 175; between types of validation, 225; cf. taxonomy, classification, taxonomy, coding, measurement, definition
- distinctness, vs. clarity, and simple vs. complex, 19-21
- distributed intelligent systems, 196; cf. mobile Internet
- diversity, 104, 204; cf. otherness, pluralism, uniqueness, individuation
- dogma, 162, 237
- don Juan syndrome, 11; cf. hero, 202-203; cf. restlessness
- Dooyeweerd, Herman; cf. multimodal, Donald De Raadt
- double interact, cf. Karl Weick, 99-100, 102-107, **118-120**; cf. agreement, cooperation, organization, Newton's syndrome
- doubt, 109, 114, 172-173, 175; as a design method, 24; uncertainty of, 105; cf. probability, risk, uncertainty, vagueness, faith, belief, trust, hope, skepticism
- downsizing, **124**, **165**; as cost reduction, **141**; as management fad, 92-93; cf. reengineering, cost

- reduction, just in time, efficiency, effectiveness, productivity
- drama, as living reality, 170-173, 175, 178, 181, 203, 244; cf. narrative, myth, rhetoric
- Dreyfus, H., 16
- drifting, or drift in the use of technology; cf. shift-and-drift, function-creep
- duplication, cf. replication, uniqueness
- dynamic knowledge or learning, 112; cf. evolutionary, learning
- ecology, 144, 202; cf. pollution, aesthetics
- e-commerce, cf. Internet commerce
- economics, 25, 37, 67, 120, 122, 124, 137-138, 141, 152-153, 163-168, 176, 211; of information, 124; mathematical, 25; and social aspect, 124; cost accounting, 65-66; economic value of simplicity, 138-139; economic theory, 152; of data bases, 120-121; of information, 124; cf. cost, benefits, capital investment, profit, measure of performance
- economy, of inquiry or thought, 15-16, 86, 120, 124, 137-138, 217; as effectiveness vs. parsimony, 141; of computation, 37; economical set of data, 86; of simplicity, 137-138, of time, 81
- education, 184, 230, 268-269; and implementation, 230-236; graduate, **268**; theory of, 230; and learning, 159-160; educational process, 158; cf. learning
- effectiveness, 43, 133, 137; of inquiring systems' sectors, 133; as simplicity, 137; as economy, vs. parsimony, 141; vs efficiency, **137**; cf. measure of performance, separability, efficiency, productivity
- efficiency, vs. effectiveness, **137**; cf. effectiveness, parsimony, productivity
- EIS, cf. executive intelligence systems
- electronic commerce etc., requiring decomposition principle, 67, 165; cf. Internet
- elegance; 120; cf. aesthetics
- elementary, as simple and clear, 19
- elements, 19; cf. input, entity
- elephant and blind men example, 150, 159
- elusiveness, 4, 18, 28, 195; cf. explicitness, intuition, tacit knowledge
- emancipation, 13
- embodiment, cf. body
- embryo, 33; embryonic incrementalism, 41, 64-65, 228; as Newton's syndrome, 64; cf. adaptive system, evolution
- emotions, 203; cf. mood, feeling, conviction, value
- empiricism, 40, 61, 68, 71-72, 95-102-127, 116, 129, 131-132, 134-135, 146, 150-153, 155, 166, 171, 242; logical, 160, 166; and information, 166; and cost, 120; naive, **191**; philosophically astute, 150; empirical investigation, 134; minimalistic, 134; subjective, 153; presuppositions of, 110; British, 151; vs. mathematics, **112**; empirical method inquiry, 110, 112, 116, 121, 123-124, 155; completeness of empirical inquiry (cf. statistical sampling), 120, 124; empirical research's cost and politics, **120**; empirical language, 125; is-ought linguistic puzzle of, 102, 202; cf. experiment, experience, observation, sensation, perception, data collection, Lockean IS, chap. 5, *passim*, practice empowerment, 200; cf. autonomy, participation, politics, power
- end, 45; and religion, 242
- enemy, 98, 172, 180-181; 98, knowledge of; deadliest, 172-173, 178; cf. conflict
- England, empiricism developed in, 150
- entanglement, 167; cf. system, context
- entelechies, 39
- entity, 45, 93, 99, 104, 108, 106, 125-126, 129; as "it" or "what", 128; teleological, 93; process as entity, 100; entity relationship, 34; cf. object, system, subject, individuation, uniqueness, element, actor
- environment, 8, 13, 42-78, 150-151; esp. 51-52, **56**, 63; 166-167, 247-248; of science, 200; control of, 167; as informational constraint, 164; as size or limits of system, 56; as higher-level; cf. input, external Weltanschauung, 174; cf. separability, input, context, Swedish "handlingsutrymme", "miljö"
- EOQ (economic order quantity), 165
- epic, 174, 177, 182, 203; cf. drama
- Epictetus, 252
- epistemology, 17-18, 103, 155, 171-172
- ERP enterprise resource planning; as management

- fad, 92-93; cf. manufacturing, management information systems MIS
- error, 113, 136, 201-202, 242
- esoterism, 58, 184, 200; cf. exoteric, accuracy, measurement
- essence, 27-28, cf. existence, 76
- ether, 238
- ethics, 12, **48-49**, 63, 70, 73, 163, 197-**198**, **200**, **202**, 216, 218, 222, 255; morals 6, 17; personal, 200-201; as function of clients, 200-201; as good intentions; vs. authority-responsibility, 196; as power or cooperation, 200; and power, knowledge and beauty, 73; and theology, 200; ethical judgement, (202); vs. value measurement, 152-153; of imperative, 202; cf. values, good, conviction, goal, purpose, is-ought, greed, God, guarantor, warrant, cooperation, URL: <http://www.haas.berkeley.edu/~gem>
- ethnicity, multi-, (182)
- ethnographic method and observation, 119, 121, **125-126**, **138-139**, 154, **156**, 159-160, **166-167**, 171, **195**; cf. qualitative method, scientific method, observation
- evaluation, 136, 263-264; empirical, 110; cf. value, utility, quality
- event, 134, 136: cf. message, information, function, action, transaction
- evidence, 55, 63, 76, 112, 152, 164, 172; knowledge and probability, 55; credibility or credence, 173; vs. mood, 203; self-evidence, 27, 162; objective, 119; cf. counter-  
instance; cf. proof, truth, relevance, validity
- evil, 72, 76; cf. ethics
- evolution, 33, 63-66, 112; positivism as, 63, 66-67; evolutionary adaptive system, 63, **175**; as progress, 178; cf. flexibility, adaptive, growth, progress, incrementalism, learning, change, improvement, change, survival-reproduction, coconstruction, reengineering, embryo, adaptive system
- examples, pedagogical in the book; cf. bird (and egg, swan), dice, elephant, log, rock, sawmill, toothache, radarscope, swan, sales statistics, color perception, log across the road, sailing and smaller mind, spectacles, checkers-chess, ticktacktoe, magic square, hawk-dove, mother and quarreling sons, stooge, table or desk in measurement, monkey brain, rain today, butterfly and storm, Cuba crisis, scratches on photographic plate, young Lockean investigator, professors and dissenting students
- excluded middle, principle, 108
- executive, 27, 33, 36-38, 142, 145-146, 148; operating system, 27; executive intelligence system, 97, 112-113, 118, 124, **175**; ; executive intelligence I.S.: cf. control, strategy, intelligence, information systems, (operating system)
- exhaustive classification or taxonomy, **192**
- existence, 71, 76, 78; cf. ontology
- exoteric, 200, 219-220, 225, 237, 268; cf. esoteric
- experience, 26, 100, 119, 129, **135**, 144, 148, 170, 250; meaning of, 70; learning by, 131; human, 119; cf. learning, perception, sensation
- experiments, 42, 60, 63, 73-75, 85, 87, **113**, 134-136, 159, 183-184, **192-194**, 198-199, 229, 231, 235; as systems, 60; experimental results and theory, 192; statistical, 183-184; experimental method, 113, 135, **191-194**; positivistic, 60; as alienation, 159; Galilei's, 132; thought experiment, 191; experimental design, 113, 182, 183-184; experimentation, 51, **192**; cf. replication; cf. chap. (12) 230ff;
- expertise, 49-50, 74, **82-83**, 87, 99, 101, 111-112, 114, 162-163, 168-169, 176-177, 180, 183, 268-**269**, 272-273; and information, 101, 114, 118, 162; in inquiry, 87-88, 99; test of, 163; in systems science, 231; defense of, 269; as subsystems separability, 53; and monism, 73-74; and democracy, 176; cf. designer, consulting, specialization, artificial intelligence, expert systems, systems separability, peer review, idiot savant
- explanation, 4, 6, 26-27, 35, 37, 41, 46, 80, 83, 85-86, 100, 104, 136-137, 154; unexplainable events, 136; explanatory model, 80; cf. why, because, meaning, implication, interpretation, understanding, interpretation
- explicitness, 145, 154-155, 171, 175, 177-178, 186, 194;

- giving up, 175, 177-178; cf. implicit, tacit knowledge, design, subjectivism
- exploration, and innovation; cf. innovation
- explosion, of information, 176, 267; cf. expertise
- expressing information, 137; cf. gestalt
- extension, 77, or denotation, 161; cf. intension
- external, 20, 33, 35, 36, 84, 122, 128, 144, 149, 151, 157-159; cf. input, environment
- extrapolation, 210
- facilitator (neutral observer), 159; as synthesizer, 174; cf. negotiation
- fact (nets), **32**, 37, **39-40**, 79, 86, 88, 111, 127, 141, 143, **160**, 164, 197, 225; top-bottom-end (of implication) 32, 39-40, 79, 88; in inducer, 143; in intelligence, 98; in Leibniz, 32; in organic chemistry, 82; ranking of, 34, 37; as likely truth, 32; as information, 160
- fact, **32**, 86, 90, 150, 160-161, **164**; simple, 108; objective, 158; and action, 164; and value, 164; as likely truth, 32; and alienation of self, **161**; fact nets, 95, chap. (2) *passim*; cf. truth, data, past, evidence, information, empiricism
- fads, or research or management, 92
- faith, (164), 229, 237, 240-243; and science, 240-246; and belief, 24; cf. belief, guarantor, conviction, trust, hope, doubt, religion
- falsification, 24, **40**, 88, 98, 136, 199, 220; cf. error, truth, conviction, encryption, coding
- fantasy, 96; cf. imagination
- fascism, and socialism, 68
- feasibility, 63; as approvability-probability, 211; cf. implementation
- federative or federation, cf. system
- feeling, 13, 76, 119, 151, 161, (203), 261-**262**-264, 270-271; as primacy of the subjective, 151; as commitment, 171; sensation as surrogate of, 264-265; subjective, 114, 155, 158, 161; as mood, 182, 203; of appropriateness in design, 142; cf. mood, intuition (as "right feeling"), love, conviction, experience, sensation, emotion, postmodernism, unconscious, romanticism
- Feigenbaum, E. A., 79n, 100
- Fermat P. and mathematics, 112
- figure, of thought, 158, 169, 171-172; cf. image, vision, myth, symbol, metaphor, aesthetics
- file, 101; cf. database, library
- filter, of information, 96, 98
- fitness, as appropriateness, 262
- flexibility, 63-64, 110, 141, as change, 194; as adjustment of measurements, **196**; cf. evolution, learning, adjustment, stability, change, adaptive
- flow, (28, 155); as process vs. progress, 203-205; cf. fitness, process, creativity, imagination, intuition, inspiration, enthusiasm, progress, learning, romanticism
- forecast, 105-106, 110, 131, **133**, 150, 153, 165; cf. prediction, regularity, replication, generalization, past, future, history, improvisation, bricolage
- foreknowledge, 109; cf. apriori, assumptions,
- presuppositions, user model form, 29; logical, 108; cf. formal, experience, feeling, aesthetic, sensation, value, judgement, morphology, structure, experience, function
- formal, 29, 70, 140, 171-172, 186; formal science, 129-130; formal thinking, 6; cf. logic, mathematics
- formative context, (166); cf. environment, system, practice, praxis
- fourth-box imagery, 216, 243
- fragmentation, 202
- framework, 110; conceptual, 72, 143
- freedom, 11-12, 245; of inquiry, 58, of the press, 196; 71; of action, 164 and cf. degree of freedom in action (in Swedish)
- handlingsutrymme, 7, 13; academic, 58; cf. stability, responsibility, autonomy, power
- function-morphology/structure-teleology, 44-45, 197, 214; in Ackoff's book *Scientific Method* 155-163; of systems, 75; basic functions as apperception, 75, 78; as action-activity; psychological, 261; functionalism, (204); cf. form, biology, Ackoff-Emery's book *On Purposeful Systems* pp.19-32
- functionality; cf. measurement of performance, satisfactoriness, quality, aesthetics
- future generations, 59, 247, 201, 254; vs. past, 201; as client, 201; cf. death, ancestors
- futures research, 131; cf. forecast, prediction, cause, past-future

- fuzzy sets, 105, 214  
 förutsättningslöshet (Swedish for no presuppositions), 124; cf. apriori  
 Galilei, G. 132; debate (112)  
 gambling, 241; cf. play, humor  
 game theory, 64, 153, 168, **235**, 241; and nature, 238; cf. gambling, games  
 games, 23, 125, 138-139, 235; cf. checkers, chess, ticktacktoe, magic square, virtuality, drama, play, rules  
 gastronomy, cf. cookery, nourishment  
 general systems theory, **41**, 75, 77, **78**, 93, (168)  
 general will (Rousseau), 162; as supreme objective mind, 174, 176-177; as collective absolute mind, 70; and group mind, 68; as good collective mind, 70  
 generalization, **8**, 79, 94, 108-110-112, 123-130-132, 145, 152, 245, 257; as learning, 108; sector of inquirer, 130; vs. counter-instance, 111-112; see particularly: 114, 125, 129, 142, **256**; vs. input, 130ff; cf. induction, learning, client generalization  
 genetic engineering; cf. molecular biology, 197; cf. information and chap. (2) *passim*  
 geodetic survey, coast and, 187  
 geographical information systems – GIS, see space-time framework, action, representation, object-orientation  
 geometry, 28, 128-129, 134, 136-137, 197; alternative, 129; Euclidean vs. hyperbolic solic, 136; of physicists, 137; and arithmetic and kinematics, 197; cf. space  
 Gestalt, as expression of information, 137-143; cf. pattern, expression, representation  
 GIS, cf. geographical information systems  
 goal; goal-seeking behavior, 210, 213; vs. ideal vs. overall purposeful activity, 5; partial, 73; teleology, anti teleology, ateleology, action  
 God, 12, 23, 24, 33-34, 36, 69-70, 72, 74, 95, (176)-177, 203, 205, 241; and intuition, 28, 243; in Leibniz, 33-34; as manager, 74; as the whole and overall system, 69-70; proof of existence, 23, 33-34, 70, 263; and research, 244; as scientist, 74 vs. 96; as supreme objective mind, 174, 176-177; as general will, 162; as cooperation, 200; as Buddha, 204; as endless approximation, 199; and the hero, 205; message from and hero, 203; design of relationship with / heroic mood, 205; Hegelian 177-178; as theological "whole breadth of inquiry", **196**; cf. religion, guarantor, warrant, Christianity, ethics  
 good, 12; in rationalism, 73; ranking of goods, 73-74; as power in design, 6, 3 vs. 12; cf. ethics, values  
 gossip, 98  
 government; cf. state government, management, monism, executive  
 graduate education, as young researcher, 121, 199  
 graph, 83, 181  
 greed, and hypocrisy, 173  
 grounded theory, 61-62, 84  
 group mind, 68  
 grov bild (in Swedish), cf. coarse picture, vision, image, simulation, detail, vs. skarp miljö  
 growth, cf. evolution, progress, incrementalism, learning, improvement, change, coconstruction, reengineering  
 guarantor, 59, **62-63**, 47, 53-54?, 59-60, 62-63!, 68, 71, 73, 76-78, 93, 98-99, 105, 123-124, 144-145, 160, 162, **176-177-178**, 201, 204-205, 216, 229, 237, 239-240-241, 276; design of, 23; in Lockean IS, 115, 123; external Hegelian, 145; and nature, 274; and future generations, 247; as Hegelian Absolute Mind, 174; as information master vs. slave, 161; for the elephant and the blind men, 159; as Hegelian over-observer, 191; of a clock, 135; of reality of inputs, 123; cf. control, warrant, belief, faith, God, ethics, conviction, security, trust  
 Habermas, J., as faith in the existence of agreement, 243; cf. action language, is-ought, Werner Ulrich, (Austin), (Searle's) speech acts  
 Hadamard, 28  
 handlingsrationalitet, cf. action, response  
 handlingsutrymme (Swedish for environment, degrees of freedom in action) and design 7, 13, 105; cf. environment, resources, functional class, external, situated action, autonomy, freedom, politics, oppression, conflict, agreement  
 hawks, and doves, 182  
 Hawthorne (idea), 54  
 HCI, cf. human-computer interaction  
 HCS, Ivanov's "humanistic computing science"

- imagination, 13, 18-19, 27, 30, 32, 36, 96, 116, 122, 127; cf. creativity, design, fantasy, aesthetics, combination, metaphysics

- immediacy, of sense data, 155  
 imperative mood, 102-3, 105, 115, 201-202, 247; judgment of acceptance of instruction in, **164**, 202; and linguistic puzzle of empiricism, 102, 202; cf. indicative; cf. is-ought, ought, deontic, action, instruction  
 implementation, 5, 13-**14**, 18, 47-48, 52, 59, 65-66, 92-93, 114-115, 180, 193, 199, 219-229, 230-236, 269, 274; causes of failure, 232-235; cf. action, politics, measure of performance, satisfactoriness, teleology  
 implication, 26, 31, 37, 39-40; cf. inference, induction, deduction  
 implicitness, 178; and explicitness, 155; cf. explicitness  
 impression, 119; cf. sensation  
 improvement, 111, 153, 165, 201; cf. learning, progress, change, evolution, measure of performance, chap. (7) *passim*  
 improvisation, **11**, 41, 63, 83, 120, 153, **124**, 153, (167); and planning, 41; as circumambulatio, 205; as storm sailing, 11; cf. change, situated action, bricolage, shift and drift, postmodernism, satisfactoriness and satisficing, vs. forecast, prediction, planning  
 income, measurement of, 189-190; cf. benefit  
 inconsistency, and its overcoming in reading, 197; cf. consistency  
 incrementalism, 41, 65, 71, 228; cf. trial & error, change  
 independence, 191; cf. autonomy  
 indicative mood, 102-103, 105-107, 109, 115, 135, 168, 201-202; as expert judgment, 164; cf. is-ought, imperative, mood of propositions  
 individualism, 4, 68, 71, 154-156, 193, 202, 204  
 individuation, 36-37, 111, 129, 131; and identification, 111; by space-time, 110; and uniqueness, 204, 245; vs. classes, 108; as same-another, 151; Jungian process of, 262; cf. identification, uniqueness, entity, object, item  
 inducer (induction) and fact net, 143  
 induction, 26-27, 79, 83, 87, 94, 108-110, 111, 115, 123, 124, **145**, **151-152**; explanation of, 80; justification of, 79; Lockean, 112, 123; problem of, 80, 88; and deduction, 145; strategy of, 111; as a system, 90; Mill's laws of, 113; inductive logic, 123; classical 79, 83; cf. generalization, deduction  
 inference, 94, 151-153, 191; from observation, 87, 152; cf. induction, implication, deduction, generalization, learning  
 infinite regress, 178; regress or vicious circle, 168-169, 188  
 informatics, as method-science, 60, (74); cf. information, information systems  
 information; 9, 147, 85, 121, **159-162**, 164-5, 167-**168**; **171**; structure 136-137 & 139; auditors, 162; additional or knowledge, 85; and politics, **121**; and authority, 164; basic, 165; expressing (gestalt), 137; bureaucracy, 162; explosion 91, 267; and event or message, 136; interpretation of, 137, 142; the conquering lord, 161; economics of, 124; empiricism, 166; experts, 162; in inventory control, 165; and mind, 160; master-and-slave, 160-161; morality, 163; public, 176; reception of, 100, 128; retrieval of, 101, 162; and teleology, 163, 165; mathematical theory of, 161; and Weltanschauung, 169-179; digital, 161; systemic, **167-168**; teleological, 165, 167-168; structures of, 137; human as information processing, 161; vs. data, 171; society, 217-218; for action: see log, rock, action; cf. data, fact, input, message, event, knowledge, bits  
 information system, 54, 56, 62, 85, **167-168**; as part of or vs. system, 56, 60; as design system, 54; as model or data, 61-62; reality of, 72; vs. data base, 85; analogy to "total generator plant", 72; as production system, 141; and organization, **121**; executive and strategic, **175**; cf. data base, information vs. object, metaphysics or ontology, inquiring system, *passim*  
 information technology IT, cf. computer, communication, informationinnate ideas, 33-36, 84, 105, 116, 122, 145  
 inheritance, 108  
 innate ideas, chap. 2 *passim*, 145  
 inner process, 107  
 innovation, sociology of, 93, **193-194**; as restless change, 199-200, 203; and exploration (of e.g. technology), 193, **199**; and heroic quest, 203-204; cf.

- creativity, change,  
technology spread  
acceptance assimilation
- input model, 142-143
- input, 19, 20-22, 33, 35, 45, 96, **84**, 86, 91, 96, 99, **100**, 106-**107**, 116, **118**, 128, 137-138, 142-145-**146-147-148**, 151-152, 154, **157-159**, 167, 196, 239, 265; as validated received entity, **107**; input process, 99-100; mode of receiving, 137; inputs and models, 140, 143, 147-148; arrows and boxes, 107; as stimulus, 159; reality of, 122-123; as mode of receiving information, 137; as inside/outside, 96, 151; distortion of, 156; adjustment of **196**; as part of the unconscious, **265**; cf. observation, measurement, information, message, apriori, inside-outside; environment, idea, reception, data collection, problem definition
- input-output; representation of observer, 84, 156
- inquirer (not a special type of person), 268
- inquiry: as production system, 141; error in, 113; simplicity of, 142
- inside-outside, 96, 150-151; cf. input
- insight, 81
- inspiration; cf. creativity, intuition, imagination
- instruction; cf. is-ought, learning, imperative mood, program
- instrument, **81-83-94**, 115-116, 136; vs. theory, 83; teleological, 93-94; test of, 83; cf. tool, means, measurement
- intellect, 27, 145
- intelligence, 4, 16, 97, (125), 137, 140-141, 143-145, 259-260; intelligence test, 39, 140-141, 143; cf. artificial intelligence, distributed intelligent systems, intelligent agents, reason-intellect, mind, knowledge
- intelligence systems, military, 97-98, 124; cf. strategy, enemy, competition
- intelligence tests, 143
- intelligent agent, cf. agent artificial, artefact, artificial intelligence AI
- intelligibility as design, 145, 155; cf. explicit
- intension, 77; cf. extension
- intensity, of impressions, **107**, 119; cf. sensation
- interaction, 31, 43-46, 159, 168-169; cf. action, reaction, response, stimulus, dialectics, communication, cooperation, learning, conversation, sweep in, human-computer interaction HCI-CHI
- interactivity, 15-16, 83ff, 106, **159**, 168, 170, **171-174**, 183; cf. action-activity, reaction, response, human-computer interaction
- interdisciplinarity, 40, 74-75, 195, 197-198, 200; cf. system, transdisciplinarity, apperception, sweep in, conversation, perspective, aspect, Weltanschauung
- interface, 151; cf. separability, interaction, action
- internal-external (cf. input), 26, 26, 33, 36, 84, 107, 122, 128, 138, 144-145, 151, **156-157**, 159
- international body, authority of, 188
- Internet analogies, **9-10**, 13-16, 26, 61-62, **117**, 120-**121**; Internet design, 128; navigation browsing
- retrieval, 62, 117; Internet commerce, 165; as scientific communication, 61-62; requiring decomposition principle for business analysis, 67; cf. library, communication, database, hypermedia, network, World Wide Web
- interpolation-extrapolation, 112; cf. partitioning
- interpretation, 110, 136-137, 142; ease of, **137**; of data in Weltanschauung, 110, 169-170; of sensory responses, 194; of information, 137, 142; cf. meaning, perspective, understanding, explanation
- interpretive approach, 49, 158-160, 170-**172**, **174**, 176, **181-185**, **198**; cf. phenomenology, understanding, meaning, life, intersubjectivity
- interpretive community, **159**; cf. chap.(5) *passim*
- interrogative mood, cf. mood of propositions
- intersubjectivity, 149, 159, 169; cf. hypersystem, interpretive approach
- intervention, 171; cf. participation, cooperation, conflict, politics, implementation, reality
- interviews, and alienated experimenters, 159; interview technique, 120-121; cf. conversation, data collection, questioning, understanding, explanation, interpretation
- introspection, 107, 129, 150-156; as inner process or reflection, 107; cf. subjectivism, reflection, self-reflection; (sensuous)
- intuition, mind
- intuition, 21, 25-28, 71, 76, 80, 81, 84, 87-88, 90, 92, 114,

- 119, 120-121, (150-151), 153-155, **158**, 171, 176-177, 194, 203-205, 243, 261-263; as subjective feeling, 114, *119*; as common sense, 13; Spinozian, 25-28; as poetic fashion, 153; reflective, 107; sensuous, 131, 145; as aesthetical fitness, 80; having a feel vs right feeling, 90; aesthetic intuition, *124*; cf. judgment, creativity, imagination, perception, sensuous intuition, unconscious, elusive, drama, romanticism, inspiration
- invariances, 156; cf. change, trial and error, stability
- inventory model, 53-54, 165-166; cf. Internet commerce
- investment, 167; cf. economics, capital
- irony, cf. humor, drama, narrative
- irrationality, 159; cf. rationality, evidence, truth
- IS, cf. information (system), 159-168
- is-it-indeed, database as, *164*
- is-ought, 52, 54, 56, 74, 102-103, 115, 133, 164, **168**, 198, 201-**202**; in prediction, 110; and linguistic puzzle of empiricism, *102*, *202*; cf. ought, instruction, ethics, ndicative, imperative, description, action
- isomorphism (cf. general systems theory), 11, 110, 125, 154
- it, 128; cf. entity, individuation
- IT-information technology, cf. computer, communication, information
- item, 101, 104; cf. individuation
- iteration (cf. self, recurrence-recursivity), 135-136
- Ivanov\*, Kristo (project SAF on privacy, integrity, and rule-of-law), *123!*, 155, 167, 172, 174, *175!*; checks and balances, 169
- Ivanov\*, Kristo, (project A2psi on "Psychology and computers"), 6, 18, 24, 25 (intuition, Hilbert vs. Brouwer), 32 (love, idiot savant), 68 (vs. Jung), 81, 82, 92, 96, 97, 98 (psiA), (129) (precision), (105), 107, 110, *118-119 (love)*, 121, 123, 150, 162, **190** (convincing), 197, *216-217 (idiot savant)*, 215
- Ivanov\*, Kristo, (project AVH on "Quality-accuracy"), 4, 6, 5, 9, 10, 15, 18, 20, 21, 22, 23, 26, 27, 29, 31, 32 (relevance), 33, 37, 39, 40, (46), 59, 60-61, 62-63, 65, 74-75, 77, 83-84-85, 86, 88!?, 95-96, 97-98-101, 103-104-105, 107, 109-110-111-113, 116, 118-120, 123, 131-132, 133, 135-136, 141, 147, 150, 153-154-155, 156, 159, 160-161,-162, 166, 167, 173-174, 175, 178, 186-187, **190-193-194**, **199**, **201-202**, 211, 218, 225, 235 (replication, precision-accuracy), 239, 242, 253, 257, 265-266, 268, 272, 273, 277; convergence of search & truth, 175
- Ivanov\*, Kristo, (project B&R on Belief & Reason), 4, 12, 24-25, 28, 34, 36, 40, 49, 96, 119, **121** (D'Arcy hierarchy spirit-knowledge), x163!, 172, 173 (love), 174, 176, 196, **200**, 203, 204-205
- Ivanov\*, Kristo, (sub project A2M on "Method for project Psychology and Computers"), 85, *92!*, 139 (mat), *154-155 (Jung-A2psi)*, *171-172-173*, , 177 (J), 178 (J), (190), 197, 240-241, 243, 245
- James, W., 164, 168, 238, 240; cf. pragmatism
- judgement, 25, 27, 28, 101-102, 113, **175**, 193-194, 202; expert and design judgment, 99; expert judgment, 164; as reflective intuition, 107; as subjective belief, 114; as intensity of impression, 119; basis for, 101; ethical imperative mode of, 202; and design, **175**; by inquiring system, 192; of whole system, 193; cf. decision, intuition, measurement, deliberation
- Jung, C.G., (105), 203-204, 205, 244, 261-262, 272, 277, 280, vs. 96, (171); value judgments, 102; type, 19, 36; psychological attitude, 105; contemporary marriage, 199; Jungian individuation process, 262; unconscious, (123), see innate ideas (vs. archetypes), myths, mood; cf. Hillman, (178, 203, 280); cf. collective unconscious, unconscious, hero, myth, individuation-uniqueness
- just-in-time, *165-166*; cf. inventory model
- justice, 123; cf. law, democracy
- Kant, 43-44, 70, 87, 106-107, 109-111, 147, 156, 158, 170, 172, 194, 242-243; vs. religion, 242; vs. Leibnizian IS, 144; transcendental dialectic, 170, 172; and Leibniz and Locke, 144; move from to Hegelian I.S., 265
- kill maximizer, 93; cf. weapon, 73
- killer application, (112)
- kinematics, 128, 134-135, 137, 197; and arithmetic and geometry, 197
- knowledge, 8-10, 12, 17, 25, 54,

- 55, 62, 95, 153-155, 189, 200, 203, 233, 276;  
 intuitive, 25; practical, 5, 11, 13, 18; personal-tacit (cf. heuristic), 101-102, 107, 154; of reality, 204; of science, 200; and love, 203; knowledge engineering or elicitation, 82-84, 87, 93, 138; as value, 95, 200; value of, 203; as power, 200; as reality and action vs. illusion, 204; representation, 137; practical, 191; systematization of, 117; vs. politics, 112, 122; striving for, 267; cf. knowledge representation, data, information, tacit knowledge, knowledge management, wisdom, politics
- knowledge management, 62, 74-75, 117; cf. navigation, inquiring systems (*passim* the whole book), knowledge, management
- Kuhn-paradigm, (199)
- labelling of inputs, 110, 117
- laboratory accuracy, 198
- labour unions (MBL-participation), 233
- labyrinth, 144
- Langefors, B., (THAIS & systems precedence analysis) 20, 24, 35, 38, 41, 45, 49, 51, 54-55, 63-64, 72-73, 77, 84, 96, 98, 101, 104, **105-106**, 118, 130, 134, 136, 139, **161**, (166), 171, 177, 186, 189, 191, **195**, 224, 236, 243, 249, 253, 256, 259, 270, 275 (ADB)
- language, 102, 104-**105**, 107, 116, 123-125, (139), 142-143, **145**, 148-149, 171, 186, 189, 195, 201-202; language input, 105, 107, 123 (SAF); empirical, 125; common, **105**; of empiricism and inductive mood, 202; of learning, 201-202: of measurement, 186; of communication, 124; and action: cf. action; passage from is to ought, 103, 105, 115, 202; language games, (105); of doubt, 109, 114; of science, 102; metalanguage and object language, 161; linguistic forms, **145**; cf. communication, conversation, illocutory forces, perlocutory forces, dictionary
- law, 74-75, 106, 108, 123, 175, 193, 198, 204, 256; penalty of, 161; law procedures, 106; as analysis of disagreements or politics, 193; and scientific law (Cranberg), 75, 198; and democracy, 123; cf. justice, democracy, Thomas A. Cowan
- leadership, 196, 200; cf. management, decision maker, heroes
- learning, 17, 56-57, 101, 108, 131, 145-146, 148-149, 173-176, 184, **201**, 228, 230-236, 268-269; learning (information system) vs. organizational activities, **56**; as generalization, **108**; objective, 149; as improvement, 153; meaning of, 131; dialectical, 180; as education, 267-268; as objectivity, (145); and experimenters, 235; and instruction, 103; and implementation, 235; in science, 228; in society, 228; computer's, 131; expression or language of, 201-202; as generalization, 108, 111; vs. tacit silent knowledge, 149; styles of learning or of inquiry, chaps. 2 to 10; dynamic, 112; about reality, 146; and education, 159-160; as psychic development, 171; learning systems, 56; by experience, 131; cf. intelligence, knowledge, generalization, induction, flexibility, progress, cooperation, improvement, insight, reason vs. intellect, trial and error, education, experience, understanding, inquiry, sweep in, objectivity, debate, change, revision, generalization, solution, stooge
- Lebenswelt; as living reality and conviction: cf. life world, phenomenology
- legal, judicial structure, 123
- legitimation, cf. authority, 163-164, 167
- Leibnizian inquirers, 36, 62, 66, 69-72, 108, 145, 147, (164), 170, 176, 197; and Lockean, 230; and Kantian inquirers, 144; generalization of, 197; and Lockean inquirers, 36, 230; and faith, 242; and unconscious, 265; Leibnizian science, 39-40; Leibnizian formal systems, 30-32, 136
- length, measure of, 152, 188
- Lenin (Stalin), 253
- levels, 11, 74, 76, 77, 91, 113-114, 153, 174, (204); of detail, refinement, 190, 192; of authority or hierarchy, 76; cf. meta-, hierarchy, organizational
- liberalism, 4, 68; cf. pluralism, chap. (5) *passim*
- libraries, 9, 11, 15, 61-62, 101, 117, 120-121, 128, 267; Alexandrian, 117; cf. data base, Internet
- life, 157, 173, 249, 258; cf.

- biology, blood, phenomenology
- life world, 171-2; cf. phenomenology
- light velocity, 200
- likeness, 101, 191; cf. identification, comparison, sameness, identification
- limit (ideal), 257; cf. environment
- limits, 73
- Lindblom, C.E., 65-66, (228), 281
- linear programming, 67
- linearity; cf. logic, time, history, Leibnizian IS, vs. hypermedia
- links; cf. networks, chap. (2)
- literature, 170; cf. drama
- living reality and conviction, 171-172
- living systems, 39, 41
- Locke, J., 154, 169, 180, 183; chap. 5, *passim*; Lockean IS vs. Leibnizian, 111, 116, 122, 230, 235, 242
- Lockean, young investigator, example, 121
- log across the road example, information vs. action, 164; cf. rock on the road, 114-115; cf. radarscope speck, 124
- logic, 6, 13, 24, 29-30, 37, 60, 70, 81, 83, 85, 92, (94), 102-103, (105), 108, (110), 113, 123-124, 134, **145**, 160-**161**, 170, 192, 195, 198; symbolic, 6; reconstructed 195, 197-198, 215, 240; inductive, 123; as probability, 113; transcendental, 145; as sociology, 198; Hegelian, 70; predicate calculus, 108; beyond logic, 192; logical forms and classes, 108; inbuilt, 108; and contradiction, 70; cf. Leibnizian inquiring systems *passim*
- logical empiricism, cf. logical positivism
- logical positivism, 134; logical empiricism, 159-160, 166; as inductive logic, 123; cf. "positivism"
- logical reconstruction, 13, 195
- logical tests, 37
- love, 24, 28, (70), (119), (160), (169), 238, 243, 246, 255, 258, 264, 266 and knowledge, 203; as agreement, 119; as cooperation, **200**; cf. cooperation, enemy, trust, beauty
- machines, 23, 39, 43-45; cf. mechanism, technology
- macro, 44
- magic square, 142-143
- majority, vote, 105, 112; cf. democracy
- management information system, cf. system, Singerian IS, hypersystem
- management, 74, (148), 158, **163**, 181, 196, 200, 227; as self-consciousness and self-reflection, 158; as science, 74; and information, 163; and delegation of authority, **163**; fads, 92; of service, 185; and art, social science and physics, 93; and authority, 163-164, 167; cf. implementation, leadership, performance, metadesigner, self-consciousness, self-reflection, authority, control, cybernetics, knowledge management
- manufacturing, 53-54, 92-93, 166-167; cf. production
- market, as non-separability, 67, 133, 167; marketing as advertising, 167; cf. pluralism, sales, demand
- Mars, unmanned space laboratory on, 91
- marxism, 18, 91-92, 99!, 97 (=Riley), 119
- (misunderstanding), 153, (174-175), 184
- (participatory); cf. communism, Lenin, economics-politics-participation-implementation, MBL
- Mason, R.O., 180-181, 184, 284
- master, and slave, 160; as servant, 168
- materialism; cf. reality
- mathematics, 26, 94, 112-113, 125, 136, 139-140, 142, 192, 195; mathematical logic, (197); arithmetic, logic
- matrices, 125; number 142
- maturation or "mognadsprocess", cf. evolution, improvement, learning, progress
- MBL medbest\_mmandelagen (participation act), cf. Hegelian IS, 159-177; implementation, politics
- Mead, G.H., (106)
- meaning, 9, 28, 30-31, 33, 70, 80, 95, 102, 104, **115**, 137, 140, 157-158, **161**, 174, **198**, 203; grounds for, 70; of experience, 70; teleological, 171; interpretive, (95); of variation, 193; as expression of information, 137; significant data, 84; creation of, see Weltanschauung; cf. understanding, learning, significance, interpretation, explanation, why, semantic, implementation, evaluation, reflection, intepretive approach
- means, 5, 45, 73, 140, 163, 256; means-ends distinction, 43-46, **269-271**; cf. tool, instrument, action, goal
- measurement, 112, 152, 186-205, 257; social, 187-190, 193; and observation, 110,

- 187; operational, 187;  
 analysis of variance in, 193;  
 a priori in, 194; authority of,  
 196; control of, 196; scale,  
 85-86, calibration of, 191-  
 192; of length, 152, 188;  
 infinite regress in, 188; in  
 Kant's problem, 194; in a  
 Lockean community, 187,  
 189; parsimony of (cf.  
 sawmill), 196; partitioning  
 in, 86, 192-193; of  
 performance, 43, 47, 50,  
 80, 90, 189, 200; readings  
 and replications, 190-192;  
 of science, 200; and  
 simplicity, 188; standards in,  
 186, **188**, 189; sweeping-in,  
 197; systems, 187-189;  
 units in, 186-189; and utility,  
 189; of performance, 50-53,  
 188-189; physical vs. social,  
 187; economic, 189-190;  
 arbitrariness of unit of, 189;  
 value of, 190; as metric for  
 weighing of end-products  
 (expected value), 46; as  
 readings, 191, 193; cf. data,  
 instrument, quantification,  
 classification, bias
- mechanics, 59, 132, 136, 197;  
 Galilei's, 132; quantum,  
 197; cf. morphology,  
 function, physical science
- mechanism, 132, 160-161, 168;  
 as imagery, 209-210;  
 mechanist information, 160;  
 cf. structure, function,  
 morphology, determinism
- meditation, cf. (prayer)
- medicine, 51, 223, 256
- memory, 6, 100-101, 157; cf.  
 data base
- mental models, 153-154, 156-  
 161; mental states, 156-  
 157; cf. representation,  
 perspective, virtuality,  
 model
- message, 118, 136, 144, 159-  
 160; of information-data,  
 144; cf. information
- meta- (cf. levels), 17, 76, 153,  
 169, 183, 263; cf. hierarchy,  
 metadesigner
- metadesigner, 148; as observer  
 of the subject, 158; as  
 perfect over-observer, 191,  
 (193-194); as overviewer,  
 235; cf. self-consciousness,  
 self-reflection, manager
- metalanguage, 161
- metaphor; 93-94, 141, **143**, 147-  
 148; as biased mode of  
 representation, 138-139,  
 141, cf. analogy
- metaphysical, 122; cf. ontology
- method, 5, **13**, 60-63, 72, 91-92,  
 113, 115-116, 132, 137,  
 143, 149, 152, 154, 171,  
 192, **195**, 274-275;  
 scientific, 60-63, **113**, **115**,  
 154, **190-196**; vs.  
 uniqueness, 205; and  
 solution, 143; qualitative,  
 192-193; resistance to, 92,  
 171; observational-  
 inductive, 115; of proof,  
 (195); trendy, 92; vs. theory,  
 132; as input structure vs.  
 theory, 137; critique of  
 logical, 195; and science vs.  
 politics, 60; resistance  
 against the methodical, **92**;  
 problematic, **143**; of  
 measurement, 152; cf.  
 science, scientific method,  
 research, solution, logical  
 reconstruction, replication,  
 generalization; dialectics,  
 ethnographic method
- metric, of expected value, 45-  
 46; cf. measurement
- metrology, chap. (9), 186ff; cf.  
 measurement
- Michaelson-Morley experiment,  
 135
- microbiology, 116
- military, intelligence, 97-98,  
 118-119, 124, 161; cf.  
 strategy, tactics, executive  
 intelligence
- Mill, J.S., 113
- Miller J.A. (general systems), 41
- mind, 6, 23, 39, 41, 87, **93**, 97,  
 150-151, 197, 261;  
 reflective, 27, 155; state of  
 mind, 156-157; absolute,  
 174, 178; constructive, 172-  
 174, supreme objective 174,  
 176-177; collective, 70, 162,  
 194, 196; group mind, 68,  
 197; community of minds,  
 97; as brain, 161; psychic  
 development of, 171; reality  
 of or models of, 151; system  
 as mind, 93; cf.  
 introspection, absolute  
 mind, intelligence-intellect,  
 soul, brain, artificial  
 intelligence
- minimal apriori, 125; cf. apriori
- mirage, 157; cf. virtual
- MIS, cf. management  
 information system
- mobile Internet (ubiquitous  
 computing): representation  
 in, 134-137; as adjustment  
 of readings in time and  
 space, 195-196; problems  
 of identification and  
 individuation, 37; as  
 distance work, 13; cf.  
 communication, inventory  
 model, distributed  
 intelligence, individuation,  
 identification
- modalities of propositions, cf.  
 moods
- modalities of thought, and of  
 systems, 197-199; cf.  
 disciplines, sweep-in,  
 apperception
- model, 51, 133, **142-144**, 147-  
 148, 165; model building,  
 147, 165-166; input model,  
 140, 142-143, 147-148;  
 normative, 133, mental, 99,  
 103-106, 154, 156-161; cf.  
 user model, mental model,  
 system, simulation, image,  
 perspective
- modernism; cf. progress,  
 optimism, enlightenment,

- postmodernism
- modus tollens, 40
- mognad, cf. maturation
- molecular structure, in mass spectrometry, 81
- molecular biology, 197; cf. biology
- monad, Leibnizian, 30, 35-36, 39, 41, 75, 77, 93, (162), (168), 212
- monism, 67-68, 71; cf. pluralism, PPB
- monitoring; cf. control, management
- monkey brain (example), 23
- mother; archetype of the Great Mother, 244; cf. archetype
- mood or modalities of propositions (indicative, imperative, counterfactual conditional, interrogative), 102; cf. indicative, imperative
- mood, 173, 182, 202-204, 205; cf. attitude, feeling, hero, Jung, Hillman, indicative mood
- morality, 24, 200, 202; and expertise, 163; vs. benefit, 250; and design, 249; and information, 163; in Kant, 255; cf. ethics
- morphological class, 44, 214; cf. function
- mother; nature), 238; and quarreling sons example, 174
- motive, good reason, 181; cf. cause, teleology, goal-objective
- multidisciplinary research, 74; cf. interdisciplinarity, inquiring systems *passim*
- multimedia, cf. sensation, system, hypermedia, postmodernism, anti teleology, ateleology, Leibnizian IS, fact nets, hypermedia, hypertext, World Wide Web; as Lockean "five modes of sensation", 100
- multimodal inquiry, 196-198; systems thinking, 75-76; cf. sweeping-in, transdisciplinarity, interdisciplinarity, apperception, aspects, perspectives; Herman Dooyeweerd, Donald De Raadt
- multiperspective approach; cf. sweeping-in
- mysticism, (58), 237, 249, 252, 265; cf. unconscious, intuition
- myth, (96), 178, 203-204, 243-244, 245n; progress as, 178; cf. narrative, drama, epos, hero, Jung, fantasy, imagination
- narrative, 32, 174-177-178, 180; as epic, 174, 176-178, 182, 270; as story telling, drama, 177-178; and accuracy, 178; vs. science, 178; as stories of the world, 32; cf. discourse, Weltanschauung, conversation, play, theater, epic, metaphor, myth, drama, Jung, story, postmodernism
- NASA, National Aeronautics and Space Administration, viii-ix, 91; cf. space mission; Mars, and whole book, *passim*
- natural image, 191, 194-195, 197-198; cf. Weltanschauung, world
- nature, 238, 260, 268, 275, 276; natural science, 159, 209-212
- navigation, in library (also as Internet analogy), 62, 117, 121; as visual recognition, 142; as input structuration, 142; as art, 93-94; cf. retrieval of information, space-time, representation, solution, knowledge management
- need, vs. demand, 166-167; cf. purpose
- negotiation, 174; vs. authorization, 196; cf. arbitrator, agreement, debate, bargaining, conflict, facilitator
- network, 9, 104, 108, 111, 196; as network organization, 196, 200 and cf. centralization, decentralization; cf. hypermedia, anti teleology, ateleology, tree, Leibnizian inquiring system (chap. 3 and fact nets), Internet, World-Wide-Web, actor network ANT
- neural nets, as induction machines 26; 119, 156; as induction from observation, 87, 123-124; cf. Lockean IS, learning, intelligence, artificial intelligence
- neuro-science, 75, 156-157
- news, cf. attention
- Newton, I., 204
- Newton-syndrome, 19, 64, 69, 123
- Newtonian mechanics, 136
- node; cf. object (chap. 5), network (chap. 2)
- nominalism, as conventionalism, 72
- nomos, laws in Greek, 80
- nonconventional, 119; cf. conventional
- nonlinearity; cf. system, hypermedia, hypersystem, postmodernism, debate, browsing
- normal observer, 101; cf. competence
- normative models, vs. descriptive, 133; ; cf. imperative mood, ought, is-ought, action, ethics
- notitia, cf. attention
- nourishment, cf. cookery
- nuclear physics, 116
- number matrices, 142

- numerical analysis, (140)
- object orientation, 149, 160, 166; as mechanical information, 159
- object, 11, 70, 72, 82, 104, 124, 131, 149, 160, 162, 192, 196, 255, (274); definition of, 109; as entity, 106; as identification-individuation, 128; vs. measurement of, 191, 196; orientation, 106, 160; subject as, **150**, 156; object language, 161; teleological object: cf. implementation
- objectivity, 63, 70, 71, 114, 118-119, 125, 145-146, 149, 166, **157-158**, **175**; and reality, 146, 158; of Lockean inquirers, 125; as design separability, 54; objective learning, 149; as agreement, 150; and debate, 162, **175**; cf. learning, absolute mind, truth, reality, otherness
- observation, 40, 60-61, 87, 96-97, 102, 110, 112-113, 115, 119, 122, 125, 138-139, 146, 149-150, 153, 159, 166, 168, 189-**191**, 198; observational process, 97; design of, 119; what to observe and teleological information, 166; direct, 154; participant, 159-160, 184; accuracy of, 154; reporting of, 157; as a reading, 190-191; participant, 156; and adjustment of readings, 195; and hypotheses, **193-194**; directing an observation, 112-113; history of, 191; adjusting observations, 194-196, perfect observer, 111-112; and measurement, 110, 187; inference from, 87, 152; independent, 191; cf. input, sensation, perception, attention, measurement, perfect observer; counter-instance, ethnographic method
- observer, 6, 40, 101, 106, 146, 150-151, 153, 159; as user, 156, independence of, 191-192; of an observer, 146-147, 150-151, 158, 172, 235; representation, 159; as a synthesis, 173; perfect or normal, 40, 101, 111, 150-153, 159, 191; training of, 198; neutral facilitator, 159; observed as an object, **150**; designer as, **150**; over-observer: cf. metadesigner, manager, aspect, perspective
- obsolescence, of inventory, 165; cf. (Swedish) lager inkurans
- obviousness, 98
- Ockham's razor, 72, 138
- ontological transformations, as maximal apriori, 138-144
- ontology, 28, 34, 69, 76, **144-147**, **160**; ontological commitment or assumptions, 144-145, **191-192**; as existence, 69, 72, 76, 78; and epistemology, 76; in pragmatic sense, 78; essences, 28; ontological status of sense impressions, 72; in the improper sense of predication, (103); cf. reality, assumptions, essence, existence, interpretive, phenomenology, ontological transformations, virtuality, metaphysics
- operationism and operational definitions, (115), 153, 186-188
- operations research, 166
- operating system, cf. executive
- opinion poll, 170-171, 183-184
- opinion, 114, 154, 162, 184; opinion survey, 106, 184: cf. subjectivity, conviction
- opportunity cost, 165, 167-168, 170; cf. cost
- opposition, 173; cf. conflict
- oppression, 163; cf. alienation, power
- optical character recognition, OCR, 26
- optimism, 202; self-awareness, production-cooperation-progress, 178, 186
- optimization, 67, 94, 152; 171, 182; and satisficing, 51; as maximization of utility, 263; cf. satisfactoriness, improvisation
- ordering, 152, 155, 192; cf. ranking
- ordinality and cardinality, in measurement, 152; cf. preferences
- organism, 197; cf. biology
- organization, 72, 77, 97; theory, 72, 77; studies, 133, 170-171; and standard costs, 66; study of, 170-171; of knowledge, 97; and information system, **121**; social, 97; network or horizontal, **196**, 200; organizational behavior, 133; cf. system *passim*
- original, cf. individuation, uniqueness, replication
- otherness, 104, 151, 158, (161), 177; cf. uniqueness, objectivity, identification, diversity, difference, sameness, introspection
- ought, 52, 74, 133, 195, 201; and how-what, 195; cf. ethics, is-ought, imperative, normativity
- outliers, statistical, (111-112), 194
- output, vs. input, 137; cf. input
- outsourcing, 165-167
- overviewer, 235; cf. metadesigner
- owner, of problem, 146

- paradigm, 15, 39-40, 85, 111-113, 194, (198), 199;  
 paradigmatic science, 39;  
 cf. culture, scientific  
 paradigm as style of inquiry  
 paradox 135; systems analysis',  
 217; 255; of teleological  
 information, 164  
 Pareto-optimality, 152  
 parsimony, 72, 138, 196; design  
 of, 134, 138; and economy,  
 124, 141; in measurement  
 (cf. sawmill), 196; in  
 generalization, 84-90, 114;  
 cf. simplicity, economy,  
 richness  
 parsing, 20, 30, 34, 36, 81, 142-  
 143, 147  
 part, of system, 50, 56; cf.  
 subsystem, component  
 parti, such as basic general  
 scheme of an architectural  
 design, as generation of a  
 conviction, 171; as an  
 apriori, 143; as hypothesis  
 creation in design, 116; cf.  
 reflective intuition,  
 imagination, design  
 participation, 196, 201, **250**; and  
 hierarchy, **77**; participant  
 observation, 159-160, 184;  
 lack of, 159; cf. MBL,  
 dialectics, democracy,  
 implementation,  
 cooperation, politics  
 particular, vs. the general: cf.  
 implementation, action,  
 situated action; cf.  
 generalization, judgment  
 partitioning, 85-87, 112, 175,  
 190, 192-**194**; cf. precision,  
 interpolation, disagreement  
 passion, 171-173; cf. conviction  
 past-future, 110, 153, 160, 166;  
 history, 166;  
 unchangeability of, 160; cf.  
 history, forecast, prediction,  
 time  
 past generations, 160-161, 201;  
 cf. history, time  
 path, 140  
 pattern, 5, 27, 26, 100, 123-124,  
 126, 138-140, 150, 173;  
 recognition, 94, 100, 124-  
 125, 140, 142, 150; cf.  
 image, optical character  
 recognition  
 peace, 71, 173-174, (188); cf.  
 cooperation, conflict  
 peer review, 15, 35, *101ff*, **162**,  
 221; hearings, 272; as  
 collective subjectivity **58-59**;  
 cf. expert, agreement,  
 consensus  
 Peirce, C.S., (187), cf.  
 pragmatism  
 perception, 26, 30, 75, 103,  
 112, 123, 138-139, 142,  
 144, 155; selective, 171; as  
 interpretation of sensation,  
 194; vs. sensation, 125; cf.  
 sensation, observation  
 perfect observer, 40, 111-112,  
 150-153, 159, 191; cf.  
 observer, politics of science  
 perfection, 73; cf. quality,  
 completeness  
 performance, 91; of standard,  
 188-189; cf. measurement,  
 purpose, function and  
 functionality, evaluation,  
 cost-benefit  
 perlocutory forces; cf.  
 pragmatism  
 personal knowledge, 150-151,  
 153-154, 173; cf. tacit  
 knowledge, silent  
 knowledge, community  
 knowledge  
 perspective, 75, 111, 118, 125-  
 127, 139, 142-144, **149**,  
 153, 155, 158-159, 168-  
 169, 170-172, **174**, 175-  
 177, 183, 194, 198;  
 teleological, 168; narrow or  
 broad, 174; as state of  
 mind, 156-159;  
 transperspectivism, 75; as  
 psychological attitude, 105;  
 as ways of looking, 159; as  
 conviction, 172; as  
 structuration of inputs, **142**;  
 vs. truth, 143-144; and  
 world-view or natural image,  
 194, 196; as apperception,  
 73-75; as input strategy of  
 an a priori, 137-145; as  
 Singerian natural image,  
 191, **194**; ; as imageries of  
 nature, 191, 194-195, 209-  
 212; cf. aspect,  
 Weltanschauung, apriori,  
 apperception, (point of)  
 view, observation, model,  
 (Kantian) representation,  
 impression, interpretation,  
 opinion, system  
 PERT program evaluation and  
 review technique, and CPM  
 critical path method, as  
 project management, 92-93  
 phenomenal-phenomenology  
 (cf. ateleology), 139, 151,  
 157, 158; phenomenal  
 world, 138-139  
 phenomenological approach,  
**144-145**, 151, 153-**155**,  
**158-159**, 177, 257; and  
 truth, 257; cf. interpretive  
 approach, hermeneutics,  
 Lebenswelt  
 phenomenon, 139; cf. event,  
 observation, reality  
 philosophy, of science and  
 language, 195; and *passim*  
 photographic plate, scratches  
 on (example), 137  
 psychic development, 170-171  
 physical science, 116, 137, 192,  
 197-198, 210; and art,  
 management and social  
 science, 93; geometries of  
 physicists, 137; physic's  
 data, 137; cf. Newton,  
 Galilei, Newtonian  
 mechanics, relativity theory  
 Piaget, J., 102  
 picture, 20, 151; of alternative  
 actions or Weltanschauung,  
 169; rich picture, 71-72; cf.  
 image, vision, pattern  
 planner, cf. designer  
 planning, 48, 67, 74, 77;

- dialectic, 180; difficulty of, and design, 153; cf. design, management, hierarchy
- Plato, 18, 36, 41n, 67, 78, (139); on memory and recognition, (101); and pre-Socratic 41; Platonism, 41n
- plausibility, 171
- play, 125, 138-139, 203-204, 235, 241, 254; cf. drama, gambling, game, humor, narrative, epic, myth
- pluralism, 25, 68, 71-73, 78, 92-93, 105, 111; as plurality, 105; and diversity, 204; cf. agreement, democracy, monism, pluralism, relativism, liberalism, values, actor network, polytheism, postmodernism, chap (5) and chap. (7)
- passim*
- Poincaré, 28
- point of view, 75; cf. perspective
- policy, of research, 122; cf. strategy
- political science, 59-60
- politics, 58-60, 68-78 esp. 74, 106, 119-120, 122-123, **172-173**, 184-185, **193-194**, 200, 217, 220, **222-225**; 270; and scientific method, **60-61**; and subjectivity, **120**; and information, 122; vs. knowledge or science, 112, 122, 247; as analysis of disagreement, **193**; and implementation, 66, 233; and the state, 204; inquiry of, 58-59, 217, 247; as myths, 96; as incrementalism, 66; political consciousness, 184-185; of research or science, 88, **122**, 180-181; of science, 58-59, 111, 122, 180-181, **193-194**; and cost of empirical research, **120**; cf. agreement, disagreement, general will, pluralism, democracy, power, cooperation, conflict
- pollution, 144, 202; cf. ecology
- Polya, 28
- polytheism, 73
- Popper, K., (136), (199); cf. validation, error
- popular science, **8**, **271**
- positivism, 51, 60-61, 81, 102, 108, 110, 114-115, 119-120, 122-123, 125, 129, 132-134, 142, 145-146; 160-161, 164, 195, 197-198; logical, 134, 160, 195; in evolutionary development, 63; as inductive logic, 110, 123; logical, 159; cf. agreement, conventional, logical
- positivism, database
- possibility, 161
- postmodernism, 32, (36), 40, 49, 68, (71), (95), (168), 170, (177), 178, 187, 189, (196), **203-204**, 217, 276; as progress-process, 40-41, 203-205; as anti thinking, 177-178, 255; as subjectivism, 153; as process, **203-204**; cf. anti-thinking, anti teleology, anti-planning, ateleology, romanticism, pluralism, antinomy, relativism, skepticism, subjectivity
- hypermedia, multimedia, progress vs. process, sensation (as surrogate of feeling), feeling, unconscious, narrative or epic
- poverty, 144, 178, 181-182
- power, 6, 58-59, 68, 73, 112, 119-120, 160-161, 185, 196, 216-217, 219ff, 232-236; as enabling value, 200; as value and ethics 73, 200; of a central agency, 68; as cooperation, 200; as centralization, 68; veto power, 111-112; cf. politics, cooperation, agreement, oppression, alienation, monism, pluralism, democracy, authority, responsibility
- PPB (program planning and budgeting), 67, 92-93, 226; cf. systems planning, monism, strategic-tactical
- practice, 13, 166-167, 225; community of, 167; practice-praxis, 171; practical knowledge, 191; work practice, **166**; cf. reality, pragmatism, empiricism
- practitioner, reflective, 155; cf. implementation, practice
- praxis, 166
- pragmatism, 11, 120-122, **168**, 225; as making a difference, 164; in research politics, 122; cf. Dewey, J., James, W.
- prayer, 243; cf. religion, faith
- precedence (cf. Langefors), 134
- precision, 175, 196; as refinement, 86, 190-191, 196; cf. accuracy, partitioning, Ivanov (project AVH quality)
- predicate calculus, 108
- predication, 86, 103-106, 201
- prediction, 110, 131, 153, 165; cf. forecast, regularity, causality, purpose
- preferences, 152, 155; cf. ranking
- prejudice, 159; cf. apriori
- preparedness, 170
- presuppositions, 110, 124, 131, 133, 141, 184, 190; background presuppositions, 125; cf. assumptions, a priori
- primitives, vs. logic, 198
- price, 67
- pricing, and advertising, 167
- priority, of purposes, 73
- privacy, 123, 151, 155, **161**, (162), 173, 178, (220); cf. Ivanov (project SAF)
- private knowledge, cf. personal

- knowledge  
 probability 32, 45, 105, 108-109, **113**, 153, 201, 211, 214, 252; subjective vs. objective, 153; cf. risk, uncertainty, random, statistics, and logic of  
 problem, **146**; social 181; and the a priori, 138; of representation, 125; formulation, 146, 171, 195; solution, 138, 146, 254; solving machines, 38-39; problem owner, 146; cf. representation, learning, input, solution, method  
 process; endless, 199; vs. progress, 203-205; inner, 107; cf. change, action, function, progress, postmodernism, ateleology, anti teleology  
 producer-product, 8, 44-46, 51; potential, 44-45, 4; inquiry as production, 141  
 product, vs. service, 185  
 production, industrial manufacturing, 53-54; cf. manufacturing  
 production, inquiry as, 141  
 production-science-cooperation trilogy, 202; and progress, 203  
 productivity, 137; cf. efficiency, effectiveness, parsimony, measure of performance  
 professions, 74  
 professors and dissenting students (example), 199  
 profit, 124, 167; cf. cost and benefit, measure of performance  
 program 6, 103, 126; as a system, 90-91, as Leibnizian processors, 30-32; as project management, 92-93; as instruction, 103, **115**; vs. database, 202; and data 102-103; cf. PPB, imperative, is-ought  
 progress, 39-40, 153, 175-178-179, 186-205, 201-204, 229, 245, 248, 254; measure of, 189; defined as client, decision maker, and designer are the same, 201; in monism, 71; as myth, 178; vs. process, 203-204; progression of sciences, 39, 198; as adjustment of changing object, 196; as revolution of counter-theories, **199**; non-linear, 202-203; cf. absolute mind, optimism, change, postmodernism, learning  
 project management, 92-93; cf. PPB, PERT  
 proof, 195; vs. discovery, 195; cf. validity, verification  
 property, 78, 99-100, 108; maximum, 34, 73; of object, 150; cf. attribute, predicate, partitioning  
 prototype, cf. simulation, hypothesis, thesis, test, model, grov bild - coarse picture, vs. skarp miljö  
 psi, stands for psychology  
 psychic development, 171  
 psychoanalytic knowledge, (97), 155  
 psychology (psi), 75, 103, 133, 155-157, 160, 197, 204-205; as attitude, 105; and religion, 265; cf. mind, sensation, perception, emotion, feeling, conscious, unconscious  
 Ptolemaic theory, 196; cf. Copernican revolution, astronomy, apriori  
 public 176-177, 180-183; well-informed citizen, 176-177, 269; as community knowledge, 154; cf. democracy  
 public opinion, 162-163, 176  
 purpose, 5, 46-47, 69, 71, 73, 88, 163, (171), 214, 226, 246, 250; cf. teleology, end, goals, objectives, will, desire  
 puzzle, 139, 143; cf. problem, solution  
 qualitative method, 113, 115, **120-121**, **138**, **152**, 192-193, 255; as empiricism, 113-114; vs. quantitative, **152**; cf. ethnographic studies, measurement, quality, quantification, descriptive, interviews  
 quality, 12, 65, 73, 146, (165), 192-194, 266; as value, 190; (total) quality control, 65, 165, 193-196; as reliability of data, 10, 84; cf. total quality management, evaluation, improvement, learning, evaluation, quantity, tolerance, satisfactoriness, perfection, completeness  
 quantification, quantitative method, 112-113, 192-193; cf. measurement  
 quantum mechanics, 197; cf. physical science  
 questioning, 87; cf. explanation, interpretation, understanding, why, interview  
 qui custodiet custodium, 135; cf. watchdog  
 radarscope, speck on, 124  
 rain today (example) 31-32  
 random, 120, 199, 211, 252-253; cf. probability, statistics  
 ranking, 46; of entities, 73; of preferences, 152; cf. ordering; net ranking  
 rational (cf. reason), 62-64, 69, 96, 170, 256, 258, 260  
 rationale, cf. evidence, commitment, explanation, understanding, proof  
 rationalism, 40-41, 70, 96  
 rationality; and reality, 176-177; cf. inquiry *passim*, reason, truth, Weltanschauung, perspective, aspect, privacy, public, pluralism,

- personal knowledge  
raw data, 99, 137; cf. basic data  
reaction, 43-46, 118, 159, 164, 168; cf. stimulus, action, response, interaction  
reaction-response, 159, 168; cf. action-activity  
reaction-time, of observers, 197; cf. Bessel  
reactionary, 17, 173, 204; cf. conservative  
readings, 191, 193; cf. measurement  
real, realism, and ideal-idealism, 19, 35, **178**, 199; common sense, 19  
reality, 13, 41, 68-69, 72, 76, 78, 90, (96), 97-98, **122-123**, 128, **139**, **146**, **148**, 151, 157-**158-160**, 175, 178, 183-184, 186, 189-190-**191**, **196**, **199**, **204**; social, 183; as agreement, 191; as correspondence, 160; representation of, 176; of knowledge, 204; of inputs, 123; three images-visions, 213; of whole systems, 68-69, 76; living reality, intervention and participation in, 171-172, 183; database as image of, 160; as ontological commitment, 191; as realistic problem solving, 143; of the mind, 151; vs. illusion, 204; cf. truth, ontology, objectivity, Weltanschauung, virtuality, virtual reality, empiricism  
reason, unconstrained, 170, 172; good reason or motive, 181; cf. thinking  
reception of information, 100, 106-107, 128; cf. input, data collection  
receptivity, 145  
recognition, 101-102, 107, 125, 138, **145**; cf. reflection, cognition  
recurrence-recursivity (cf. infinite regress, vicious circle, self-reference), 178, 188  
recursive, 25, 169, 199; as infinite regress, 168, 178, 188; as endless process, 199; in experiments, 132, 135; recursive property of intuition, 25; cf. regression, vicious circle  
redefining of terms (cf. translation), 105  
reductio ad absurdum, 136  
reductionism, 75, 161  
redundancy, 161  
reengineering, workflow, 14, **52**, **124**, 141, 165-**167**, 174; as revision of apriori, 194-195; as management fad, 92-93; cf. coconstruction, evolution; redesign, 247; as system reconstruction, 67; cf. downsizing, change, incrementalism, cost reduction, action, activity, revision, management information systems MIS  
refinement, 87, 190, 191, **192**; cf. partitioning, detail, precision, accuracy, reliability, rough picture, grov bild, approximation, classification  
reflection, 17, 22, 28, 30, 100, 107, (112), 148, 155, 238; a priori, 129; in Lockean IS, 100, 107; self-reflection, 158; reflective intuition, 107; in action, 155; cf. self-examination, self-reflection, meaning, trial and error  
reflective practitioner, 155; cf. self-reflection, management, action, separability; cf. Schön, D.  
refutation, 149; cf. confirmation, doubt  
region, cf. subsystem parts or components in chap. 3  
regularity, 110; cf. replication, forecast, causality  
relation, 50  
relational logic, 34; cf. entity relationship  
relativism, (95), 136, (144)-145, (196), **203-204**; against relativism, 174, 276; cf. postmodernism, perspectives, aspects, virtuality, anti-thinking  
relativity, special theory of, 136  
relevance, 32, 84-85, 88, 98, 125-126, 138, 142, 165, 167, 171-172, 175; of information, 171; of input, 142; cf. attention, accuracy  
reliability of data or information, 84, 97, 109, 113, 156, 160, 162; cf. accuracy, precision, quality, credibility  
religion, 34, (40), vs. 70, 96, 98, 155, 163, 171, 172, 174, 176-177, 205, 237-238, 244, 249, 251; and theodicy, 36; and inquiring system, 264; and psychology, 265; and authority, 196; imagery of, 243; of inquiring systems, 237-246; and science, 219, **229**, 237, 239; cf. God, Church, ethics, theology, hope, faith, trust, guarantor  
repertoire, of patterns, 140, 169; of responses, 197; of experience, 170; as catalogue of opportunities, 197-198; cf. system, resources, database, classification, types, archetypes, metaphors  
repetition, cf. replication  
replication, 154, 132, 190-192, 198-199, 235, 255; of observations, 85; cf. precision, experiment, method, regularity, forecast, (duplication)  
reporting, of observations, 157; cf. data collection  
repository, of information; cf. data base, memory

- representation, 116, 125-127, 139, 158-160, chap. 6, *passim*; mode of, 156-157; cf. mental model, reality, perspective
- requirements, demand, 167
- research & development – R&D, 263; dialectics of, 180-184, process, 83, 60-61, 64, 180-181
- research, 60-62, 90-91, 190-202; system politics of, 58-59, 122, 180, basic, 244; as an exploitative term, 221; and God, 244; interdisciplinary, 198; management of, 74; pure, 120; as a system, 60, 90; automation of, 115-116; and development R&D, 180; design of, 91; method of, 91-92, 116; policy or design, 91; cf. science, learning, scientific method, politics policy
- researcher, young, 121; cf. research, science, designer, planner
- resources, 43, 47-48; resource allocation, 67, 156; resources preferences; cf. cost, input, effectiveness
- response-reaction, 157, 159, 164, 168; cf. activity, action, reaction, interactivity, stimulus
- response repertoire, 156-157, **170**; cf. chap. (2) on fact nets, chap. (3) functional and teleological classes, action, stimulus, teleology
- responsibility, 63; cf. autonomy, power
- responsiveness, cf. action-response, Hegelian IS, commitment, vs. alienation
- restlessness, 199-200; cf. contentment, hero, don Juan syndrome, contentment, postmodernism, relativism
- retrieval, 121; cf. navigation, data base
- reverse engineering, (171)
- revision, **194**, 199; as adjustment, 196; cf. change
- revolution, 173, 182, 204; cf. change, reactionary
- rhetoric, (182-184); cf. aesthetics, drama, narrative, conversation, agreement, conviction
- rich; data, 142; description, of data 120, 138, 140; representation of data, 126, 138, 141; design, 143, communication, 122; analogy, 143; of information, **138**
- rich analogy, **143**; cf. metaphor
- richness, of information as comprehensiveness of picture, **138**; of representation, **141**
- rich solution, 72, 98, 146; synthesis, 182; representation, 141; information, 98; experience, 170; cf. parsimony, minimal vs maximal apriori
- right feeling, (155); cf. feeling, conviction, aesthetics, romanticism
- risk, 124; and uncertainty, 153; cf. probability, doubt, uncertainty
- Rittel, H., 180n
- rock on the road example, 114-115
- role; cf. actor, designer, planner, decision-maker, client, human dimension, social
- Romanticism, 151, (153), 155, 158, (159), 170-**171**; 173, 177-178; as anti teleology of the designer, 249; as neo-romanticism, (203); source of in Kant, 170; as primacy of the subjective, 151, as action life vs. grey theory, 204; cf. aesthetics, intuition, feeling, anti teleology, ateleology, feeling, subjectivism
- Rousseau, J-J., cf. general will rules, 22-23, 125-126; of games, 138, 204; rules generating system, 187; no rules, 204; application of partitioning rule, 193; cf. norms, values
- rumour spread, 92
- sacrifice, 250
- SAF; cf. Ivanov, project SAF
- sailing example, and smaller mind, 11
- Saint Thomas, of Aquinas, 18
- sale, 133, 184-185; sales statistics forecast, 133; demand, 166; cf. market
- same-another, 101, 151; cf. individuation, identification, likeness
- sample estimate, 124
- sampling, 85, 88, 111, 124; stratified, (197); statistical vs. complete count, 85; and completeness of empirical inquiry, 120, 124; cf. statistics
- SAP, as management fad, 93-93; cf. management information systems MIS
- satisfactoriness, satisficing, 24, 51, 64-65, 80-82, 90, 111, 121, 124, 140, 146, 161, 167, 176, 189, 191, **199**, 202, 211, 253; as degree of confirmation, 80; as complacency, 199; cf. accuracy, optimization, solution, measure of performance, simplicity, tolerance, understanding, politics, negotiation, improvisation, optimization
- savings, and costs, 124,
- sawmill example, 166- 167, 187, 189; as simplicity of measurement, 196; cf. generalization, parsimony
- scalar quantity, 86
- scenarios, cf. vision, image,

- simulation, narrative, hypothesis, thesis
- schema, 80
- Schön, D., (155); cf. reflection, self-reflection, action, pragmatism, Dewey, design, trial and error, ateleology, anti teleology
- science, 10, 39, **60**, 74-75, 80, 91, 105, 149, 154, 158-159, 192, 195, 197-198, 203, 219, 224 (intern.), 225, 273; political and social aspects of, 122; politics of, and philosophy or sociology, 58-59, **193-194**; hierarchy or progression of sciences, 197-198; biological social humanistic behavioral, 210; and religion, 219; as story telling or narrative, 178; language of, 102; scientific method, 154; esoteric vs. exoteric, 60; formal, 129; cf. method, replication, research
- scientific communication, 61; research method
- scientific management, 74
- scientific method, 13, 72, 85, 112, 116, 154, **195**, 268; as design system and politics, **58-61**; cf. method, objectivity, explanation, validation, research, ethnographic method, qualitative method
- scientism, 60
- scratches on photographic plate (example), 137
- Searle, cf. action language
- search, "engines", 101
- security, 73, 161, 173, 204; as watchdog, 150; of data, **161**; cf. guarantor, secrecy, control, watchdog
- self, 151; and fact as alienation of, **161**; cf. interpretive, dialectic
- self-analysis, 129, 249, 265
- self-consciousness; (129), 151, 158, 186, 194, 213, 236, 241, 243, 249; in agreement, 194; cf. consciousness, autopoiesis
- self-contradiction, 31; cf. contradiction
- self-control, 196
- self-deception, cf. illusion
- self-examination, 107; of an apriori, 129; cf. (self)-reflection
- self-knowledge, 204
- self-reflection, (129), 158, (168), 175; self-reflective paradox, 148; cf. reflection, self-consciousness, self-examination, self-analysis
- semantics, 9, 10, 21, 30-31, 33, 102, 123, 144-145, 159-**161**; cf. meaning, object, language, communication, connotation or intension, denotation or extension, semiotics, pragmatics and syntax
- semiotics, 159-160; logical syntax vs object semantics vs. use pragmatics, as syntax cf. chap. 2, semantics cf. chap. 5, pragmatics cf. chap. 7; cf. semantics, object, meaning, individuation, pragmatism, symbol, observer
- sensation, 97, 99-100, 102-103, 105, 119, 128, 131-132, 138-139, 151, 153-155, 158, 194, 261-263, 265; subjective, 152; vs. perception, 125; intensity of, 152; as surrogate of feeling (cf. hypermedia), 264-265; cf. perception, feeling, postmodernism, anti teleology, ateleology
- sense; cf. sensation, meaning, understanding, argumentation, conviction, semantics, design, dialectics (chap. 7); sense data, immediacy of, 155
- sensuous intuition, 106, 131, 144-145, 158, 170; vs. cognition, 145; sensuous inputs, 170; cf. perception, sensation, observation, data separability, 111, 114, 120, 122, 133, 145-146, 164-165, 167, 177, 224, 270-271; of observational subsystems, 110, 122-123; of apriori problems, 130; of designer, **146**; cf. components, system, subsystems, hierarchy
- service management, 185
- set theory, Boolean algebra, 192
- sex, 266; cf. love, feelings, biology
- shame, 264
- Shannon, C., (161)
- shift-and-drift or function-creep, 5, 14, 45-46, 51-52, **63**, **65**, 83, 93, 153, 203, **205**; as a function of the designer, **150**; cf. function creep, evolution, trial and error, change, adaptive systems, flexibility, implementation, sweeping-in, ateleology, situated action, improvisation, bricolage
- significance, of data, 84; level, 112; of variation, 193; cf. meaning, relevance
- silent knowledge, cf. personal knowledge, tacit knowledge
- Simmons, R.F., 26, (71), 281
- Simon, H.A., (46), 65, 80, 83, 95-96, 139-140, 153, (176), 253
- simplicity, 19-20, 21, 24-25, 29, 37, 72, 96, 99ff, 103-105, 108, 113, 133, 136, 137-**140**, 141; and clarity, 24; and the a priori, 137; design of, 99; in design, 78; of formal theory, 96; and generalization, 127; of inputs, 97; in measurement, 188; of observation, 96;

- simple systems, 78; as parsimony vs. economy or effectiveness, 138, 141; economic value of, 138-139; cf. clarity-clearness, parsimony, complexity
- simulation, 142; cf. virtual reality, reality, measurement, virtual
- Singer, Jr., E.A., viii, 44, 46, 83, 85-86, 105, 119, (144), 146, 175, 178, 186, **199, 230**, 281; vs. Leibniz, 197-198
- SIS/RAS, 83, 89, 92, 93, 120-121
- situated action, 5; as situational knowledge, 11; implying a metric to weigh the end-products of outcomes, 46; why, **153**; in context, see systems; cf. action, function (functional and teleological classes), Weltanschauung, implementation, shift-and-drift, improvisation, bricolage
- skarp miljō, 192; cf. test, reality, hypothesis, thesis, simulation, picture, prototype, coarse picture
- skepticism, 131-132, 134, 152-153; cf. doubt, improvisation, postmodernism, relativism, Hume
- sketching, 20
- so-what, 164, 166, 172-173; cf. why-not
- social, 5, 8, 14, 97, 101, 104-105, 107, 118, 187, 193; and economics, 124; problems, 181; social science, 151, 181, social measurement, 189-190
- social actor, cf. (teleological) entity, (sub) system, action, teleology
- social organization, 97; cf. system
- social science, 68; and art, management and physica,
- 93
- socialism, and fascism, 68
- sociology, 120, 197; logic as, 198; of science, 193
- Socratic (pre-), 41 (Anaxagoras)
- software, cf. program; software packages, 116, 118
- solipsism, 105, 150-151, 153; cf. Berkeley
- solution, 81, 139-143; **146-148**, 150-151, **185**, 195, 230-236; and computer, 197; problematic, **143**; impossible in real systems, 143; cf. method, satisfactoriness, problem, stooge, learning
- soul, (204); cf. mind
- source, of data, 153
- space mission, NASA, 91; space probes 116
- space-time, see time-space
- specialization, 123, 124-125, 176; cf. expert
- spectacles, example, 142
- spectrometer, 81ff, 116
- speculation, 18; cf. reflection
- speech acts; cf. action
- language, ought, is-ought, illocutory forces, perlocutory, imperative, (Austin), (Searle), Habermas
- Spinoza, 25, 69, 71-72, 77
- spirituality, (204); cf. religion, God, values, ethics, culture, emotions, intuition, intelligence, mood, conviction, individual, mind, knowledge, creativity; vs. reality, anti thinking
- stability, 191, 196; cf. change
- standard deviation, 200n
- standards, 6, 11, 40, 112, 110, 186-189, 195-196, 198; as convention, 114; adjustment, **196**; as apriori or mode of receiving information, 137; cf. measurement, calibration
- standpoint, cf. aspect, viewpoint, attitude, perspective
- state government, and politics, 204; cf. politics
- states, of nature , cf. morphological classes, 159, 166; of mind, 99-103, 118-119, 151, 153
- statistics, 6, (32), 37, (61), 65, (74), (80), 84-86, 90-93, 105, 109, **110-113-116**, 120, 124, **132-133**, 134, 153, **161**, 183, 188, 192-193, 197, 211-212, **235**, 238; likelihood ration, 90; and variances in standard costs, 66; misuse of, 112; outliers in, 111-112; measures of confidence, 111; regression or least mean squares analysis, 112; sample estimate, 120, 124; statistical experiment, 183-184, **192-194**; statistical variance, 193; computerized, 112; statistical inference, 92; statistical method, 132; statistical correlation vs. causality, 131; standard deviation, 200n; cf. language of doubt, hypothesis testing, probability, uncertainty, sampling
- stewardship, cf. adaptative, evolution, learning, revision, reengineering, change
- stimulus, -response, 97, 102, 151, 154, 156-157, 159, 163-164, 168; cf. reaction, input-output, black box
- stochastic, cf. random
- stock, cf. inventory
- stock market, 212
- stooge, example and experience of implementation in education, 230-236
- story telling, 178, 180, **270-271**;

- cf. narrative
- strategy, 87, 139-140, 171, 192-**196**, 202; vs. tactics of science, 195-196; strategy, 183-185; strategic I.S., 170-171; strategy vs. authority, 196; and agreement, 105; cf. ideals, tactics
- stratified sampling, (197)
- structure, 45; of information or data, 137; tree structure, 144; cf. morphology, mechanism, determinism
- styles, 170, 266; repertoire of, 177; as form of individual expression, 267-268; styles of inquiry, chaps. 2 to 10; cf. repertoire, paradigm, aesthetics, culture
- subject, 106; -object, 158; cf. inquirer, entity, object
- subjective probability, 114
- subjectivism and subjectivity, (58), 63, 107, 114-115, 119-**120**, 151-159, 177, (196), 203-204; intersubjectivity, 149; subjective sensation, 152; in design, 63; collective, 58; subjective belief as judgment, 114; of tastes, 266; cf. objectivity, perspectives, relativism, postmodernism, romanticism, solipsism
- substance, 69, 77, 106
- subsystems, components, 7-8, 43, 49-60, 67, 77-78, 167; cf. part, component, unit, separability
- success, 47, 85, and failure, 139; cf. evaluation, measure of performance, cost-benefit, ethics, failure
- summaries, of inquiring systems, 20-21, 37, 70, 95 chaps. (5)-(10), 111, 118-119, 144, 176-177, 194, 197, 243; Leibnizian and Lockean compared, 111, 116; Lockean and Kantian apriori compared, 134;
- Kant, Leibniz and Locke, 144; this book
- supersonic transport SST, 229
- support, 4, 6, 13-16; computer support, 115, 116; cf. tool, (co)-producer, change, cooperation
- supreme objective mind, 174, 176-177; cf. God
- survival-reproduction, 210
- sustainability, cf. guarantor
- swans, example, 108-109, 111, (123-124)
- sweeping -in, 131, 146, 170, 175, 197, 199, 215-216, 253-254, 256-257; as apperception, 75-76; cf. **chap. 9 passim**, perspective, aspect, conversation, agreement, conflict, apperception
- symbol, 20-21, 30, 171; sequence of, 143; cf. icon, image, sign
- symbolic interactionism, (106); cf. Mead G.H.
- symmetry, 139
- synaesthesia, 100-102, 106, 118-119; cf. chap. (5), virtuality
- synthesis, 32, 175, 177; cf. system, agreement,
- system, 7, 39-41, **42ff passim**; **43**, 167-168, **174-175**, **195**, **198**, 200, 202; definition, 7; as data, 168; size of, 56, 58; systems development, 120; as integration of knowledge, 94; as comprehensive picture from givens, 145; whole system, 71; vs. drama, 178; larger system and components or subsystems of, 167; Singerian conception of, 195, **198**; system idea, 41; systems theory, chap. (3) *passim*; cf. general systems theory, subsystem, component, part, environment, whole,
- context, narrative, drama, interdisciplinarity, design, synthesis
- system insight, cf. learning, improvement, understanding, reason vs. intellect, intuition
- systems philosopher; 68; cf. metadesigner
- table or desk, example in measurement, 187
- tabula rasa, Lockean "blank tablet", 99-100
- tacit knowledge, 18, 21, 25-28, 28, 36, 81, 82-84, 87, 92, 138, 145, 150-153, 175, 177, 178; in agreement, 194; and knowledge engineering, 83, 87, 88-89-90, 92, 101-102, 107, 116, 118, 137-138-139, **145**, 150-153 (Julian Hilton), 154-155, 158; expert, 162; as love-conviction, 171; personal vs. communicative, 173; vs. learning, 149; explicit alternative design; drama-theater, 256-257; and unique element in decision, 256; everybody's 268-269; as direct vs. inferential observation, 153; cf. personal knowledge, public or community knowledge, expert, heuristics, personal knowledge, silent knowledge, intuition, unconscious
- tactics, vs. strategy, 192, 195-**196**
- taste, 24, 266; subjectivity of, 266; cf. style, aesthetics
- tautology, 4, 23, 29, 31, 33, 37, 116, 108, **160**-161
- taxation, and obsolescence or deterioration, 166
- taxonomy, 108, 159, 186-187, **192**; as distinctions, 270; as dichotomic classification, 159; cf. classification,

- coding, definition  
 technique: cf. method,  
 technology  
 technology, 7, 15, 23, (41), **44-46**, 200; and effectiveness, 202-203; information technology: as computer; as machines, 23; use of, 46; applied, 58; innovation and exploration of, 193, **199**; exploration or exploitation as observed by designers, 150; drifting in its use: cf. shift-and-drift; as conscious attempt to change: cf. design, p. vii et al; as resource and transformation function: cf. innovation, action-activity-production, efficiency, productivity, function vs. morphology, economy; as power-potential: power, knowledge, progress, production; as change of implication fact-nets, cf. chaps. (2) and (7) *passim*  
 teleology, 39, 45, 69, 159, (160), 163, 168, 210-211, 213, 215, 246; as cost-benefit, 163; of information, 165; cf. purpose, end, function, will, vs. ateleology, anti teleology, anti-thinking, relativism, pluralism  
 terrorism, and war, 162-163, **270**; ; terrorist mind, 173-174  
 test, 109, 136, 149; crucial, 136; hypothesis testing, **192**, 196-197; of instrument, 83; of expertise, 163; neurological or psychological, 156; related to hypothesis, see hypothesis; cf. control, validity or validation, sharp test (Swedish: skarpa miljöer)  
 textualization-context, cf. system
- Thais, Theoretical Analysis of Information Systems, cf. Langefors  
 theater, 178; inquiry as, 203; ref. Julian Hilton; cf. drama, epic, myth, narrative, play  
 theology, 24, 33, 36, 40, 68!, 70, 74, 76, cf. God, religion, ethics, morals  
 theorems, and axioms, 136, 142; cf. axiom, generalization  
 theory, 39, 87, 132-133; and input, 137; vs data, 32-33, vs. observation, 87; theoretical base for certification, 188; cf. model, conceptual frame  
 Theseus, 204; cf. hero  
 thesis, 171-177; cf. hypothesis, dialectics  
 thinking, 127, 131, 134, 259-260; cf. inquiry, design, reason  
 this book, *vii*, 4, 9, 16-18, 20, 23, 27, (37), 41, 42, 43, 63, 79, 111, 176-177, 180, (203), (205), 230, 258-259, 274-276  
 ticktacktoe, example, 125; game of, 142  
 time, 15, 160-161, 176, 197; time savings, 81, 91; cf. clock, past, space-time, history, future  
 time-space, 37, 40, 106-107, 110, 131, 149, 194; cf. geographical information system GIS  
 tolerance, 193, 191, 201; as agreement within a range, 113; cf. satisfactoriness  
 tool, 83, 86; cf. means, instrument  
 Toulmin, S.; cf warrant  
 toothache example, 151-152  
 topology, 94  
 total quality management – TQM, 165; cf. quality  
 totalitarianism, 4  
 TQM, cf. total quality
- management, quality  
 trade-off, 47; cf. values  
 tradition, 39, 87-88, vs. collective mind, 162-164; cf. fact net or chap. 2 *passim*, Weltanschauung, history, past, future generations, ethics, religion  
 tragedy, 177-178, 203-205; tragedy-comedy, 177-178; cf. drama, epic  
 transaction, 133; cf. event, sale  
 transcendental, logic, 145  
 transdisciplinarity, 74-75, 195, **197-198**; cf. interdisciplinarity, multi-modality  
 transitivity-symmetry, 134, 186  
 translation, 105, 119, 125, 136; of inputs, 143; as formal redefinition of terms, 136; cf. interpretation, hermeneutics  
 transparency; cf. understanding, satisfactoriness  
 tree structure, 100, 104, 144; cf. net  
 trial and error, 51, 83ff, 139; and improvisation, 139; cf. learning, (Leibnizian) net ranking, experiment, test, design, evaluation, change, shift-and-drift  
 trilogy (cf. optimism), production-science-cooperation, 202-203; plenty-cooperation-heroic mood, 254; client-decision maker-designer are the same, 201, **204**  
 triviality, of problem, 139-140; cf. simplicity  
 trust, 153, 163-164; as confidence, 111; vs. suspicion of dialectic within a dialectic, 183; cf. guarantor, warrant, God, love, friendship, ethics, hope, faith, belief, doubt, religion  
 truth, 21, 25, 32, 37, 91, 96,

- 103-104, 118, 174, 257; as accuracy, 63; correspondence theory of, 160-161 and chap (5) *passim*; coherence theory of, see chap. (2) *passim*; intuitive, 25; true estimate, 51; privileged, 39-40; and cost, 91; Internetlike truth, 91; as end point of process, 37; cf. reality, objectivity, fact, depictive, accuracy
- Turing's test, (150)
- ubiquitous computing; cf. mobile Internet, communication
- uncertainty, 105, 109, 114, 153, 196, 201, 212; of doubt, 105; blocked out of discourse, 202; cf. risk, probability, doubt, statistics, conversation killing
- unconscious, 28, 120, 123, 203, 244, 264-265, 272; collective, 203; and creativity, **265**; input as part of the, **265**; cf. feeling, emotion, anti teleology, ateleology, postmodernism, intuition, Jung, myth
- understanding, 4, 49, 72, 75, 104, **198**, 203; and compassion 11; cf. explanation, meaning, reason, agreement, learning, satisfactoriness, interpretation and interpretive approach
- unexplainable events, 136
- uniqueness, 32, 190-191, 193, 204-205, 245, **255-257**; in planning, 255; as (ref. Martha Nussbaum), 73; of measurement system, 190; cf. ethics, good, utility, quality, measure of performance, ideal, goal, ateleology, worth
- variation, analysis or statistical, 65-66, 191, 193; significant, 193; cf. change, partitioning, disagreement
- differentiation, 265-268; of individual, 204; cf. individuation, generalization, otherness, method
- unity, of client-designer-decision maker, 201, 204; cf. system, separability, entity, individuation, identification
- unit, of measurement, 186-189; cf. measurement, standard, entity
- universal proposition, 83
- university, 57, 59, 122
- usability, 101, 117-118, 121; cf. human-computer interaction HCI/CHI, purpose, measurement of performance, evaluation, satisfactoriness, quality, aesthetics, function- (functionality)
- use or user behavior, 101, 117-118, 156; vs. designer, 118; user models, 125, 156
- usefulness, 120; cf. utility, pragmatism, measure of performance
- user friendliness, 121
- user model, 10, 118, 121, 125, 146, 157; -language, 125; as observer-subject, 156-157; cf. model
- utility, 120, 151-152, 163-164, 189, 200, 263; as measure of value, 152-153; vs. aesthetics, 189; cf. preferences
- vagueness, 186, 245; cf. doubt, clear, clarity, distinct
- validity and validation, 22, 29, verification, 13, 185, 187; cf. validity, evidence, confirmation
- veto power, 112; cf. counter-instance, politics of science, perfect observer
- vicious circle, 169; vs. infinite regress, 168-169; cf. self-reference, regression
- view, point of, 107, 149, 171, 83, 85, 80, 88, 96, 103, 108, 115, 128, 130, 149, 162, 189-190, 192, 225, 242; as confirmation, 80; as verification, 185; as evaluation, 136; of apriori axioms, 130; of sensation, 103; of apriori, 128, 130; as relevance, credence or evidence, 171-173; and politics or use, 225; theoretical base for, 188; cf. verification, test, accuracy, truth, reliability, confirmation, precision, experience, proof, value-worth, evidence
- value; 71, 73, 102, 152, 163, 137-138, 189-190, 200, 249; vs. good value, 95; measure or comparison of, 152; value preference, 152; value judgments, 102; of knowledge, 203; of income, 190; economic, 137-138; value judgement or valuation, 163, 169, 192; as good in activity itself, 249; value and information, 121-122, 163-164; enabling power as, 200; ultimate, 163; and fact, 164; measurement of, 152; ≈as personal value, 200-201; as quality, 190; as utility, 263-264; as trade-off, 47; added, 166; as power vs. ethic Peirce-Schiller in HCS, 95, 200; Aristotelian pluralism vs. Platonic monism 177; sharing views, cf. agreement, consensus; cf. aspect, perspective, attitude
- violence, as in terrorism, 173-174; cf. power, strength, Arendt, H.
- virtual organizations, cf. virtual reality, Internet commerce, organization, system
- virtual reality, **64**, (72), **96**, **122-**

- 123**, 128, 137-139, 159, (183); as ideal, 178; and aesthetic intuition, 144; as legitimate distortion of inputs, **156**; reality of, **150**; relation to reality, 189; in measurement system, 187, 189; as adjustment of readings or observations, **195-196**; as abstract mode of representation, 137; as realistic world and representations, 138-139; as reality vs. illusion, 204; and modes of sensation (see synaesthesia), 100, 102; cf. virtuality, reality, ontological assumptions, mind, truth, simulation, representation (chap. 6), entity, measurement, visual, implementation, constructivism, imagination, aesthetics (appearance, perspective, sensation, imagination), abstract, illusion
- virtuality, 19, 64, (72), 76, 122-123, (190), 195; vs. reality, 13; and distinction between reality and non-reality, 97; cf. reality, virtual reality and real, artificial, truth, error, system, perspective, synaesthesia
- vision, 170-**171**-172, **174**; as thesis, 172; as policy, 180-185; visual recognition, 142; as conviction, 178; color perception, 157; and design, **173**; cf. idea, strategy, conviction, Weltanschauung, thesis, ideal, intuition, figure of thought, sensuous intuition, form, creativity, aspect, perspective, view, image, picture, pattern, observation, attitude, elusiveness, ateleology, tacit knowledge, inspiration
- visualization, 125, 138-139; image recognition, 123-124; cf. representation, perspective, sensation, solution, virtual reality, human-computer interaction HCI
- vitalism: cf. living systems
- VR, cf. virtual reality
- wandering (circumambulatio), 205
- war, or terrorism, 162-163
- warehousing, cf. inventory
- warrant, 98, 163; warranted database, 195; for authority, 163; cf. guarantor, watchdog, accuracy, reliability, ethics, theology
- watchdog, 135, 150, cf. guarantor, control
- we-them dialectics, 146
- weak philosophy, vs. strong implications, 152-153
- weapon, 73, 93; cf. kill maximizer
- Weick, Karl, see double interact **118-120**, stimulus response, repertoire of responses, vicious circle, interaction, consensus
- Weltanschauung, 32, 169-179, 181-185, 194, 238, 250; and information, 169-179; counter-Weltanschauung, 224, 249; and conviction, 98; dual, 198; and Singer's natural image, 194; cf. culture, tradition, view, perspective, aspects, meaning, vision, image, world, ontology
- wff (well formed formula), 31
- what-how, 84, (128), 195, 223
- whole, 193; system, 68, 71; whole system as God, 69; wholeness as system, **145**; scope of inquiry, 195; cf. system, context
- Whorf, B. (language), 144-145
- why, 4, 5, 115, **163**, **172**, 194; as power in design, 6; and because, **79ff**; vs. what, **115**; cf. explanation, meaning, because, causality, teleology, how, what
- why-not, 164, 172, **199**; cf. so-what, explanation, because
- will, 169, 170-172; general, 162; as supreme objective mind, 174, 176-177; cf. ethics, evaluation, value
- wisdom, 236-273; cf. knowledge
- Wittgenstein, L., (151), (160-161); language games, (105); cf. (Leibnizian) nets
